Up and Down The Avenue

By Don Moffatt

This week The Enterprise goes to every home in the Canyon area, from Mehama to Idanha. Hope you people who are not regular subscribers to this newspaper, will see fit to send in \$2.50, which will pay your subscription for a whole year.

The reason for this special coverage is because of the vital issue of school consolidation. Three men, one from each of the three districts involved, have compiled the data which is on page one of this issue. This data, founded entirely on facts dug out of school records, should be of interest to every taxpayer of the districts. It gives figures that prove conclusively that a larger school unit can educate children for less money per student, and at the same time give them a better educational background.

It is sincerely hoped that everyone will read these facts and figures and give them consideration. These men, who compiled the data were selected at a meeting of the three school boards held in January.
