From the world's largest maker, a completely new kind of V-8

The V-8 engine has come a long way since Ford introduced its first V-8 over 22 years ago. During these years, preference for the V-8 engine has grown steadily . . . and today there are twice as many V-8's being built as there were right after World War II. This demonstration of car buyers' preference is proof that the V-8 engine is best suited to modern motoring needs.

For 1954, Ford has stepped even farther out front with the revolutionary new Ford Y-Block V-8 . . . the most modern "eight" in any car at any price! This new deep-block, low-friction engine brings you even smoother, quieter power . . . even

longer engine life and less gas waste. And this great, overhead-valve V-8 costs less than any other "eight" . . . less than practically any other "six," too.

But the new Y-block V-8 engine is only one of the many "Worth More" features you get in a V-8 Ford. You also get the smoother riding and easier handling of Ford's new Ball-Joint Front Suspension. You get your pick of 14 brilliant new body styles—with trend-setting interiors. And you can have power steering, power brakes, power windows, power front seat, and Fordomatic Drive as options.\*
