unceasing war on a world of killers

LEEUEWENHOEK, in 1683, was the first to disturb the pri-
vacy of the teeming bustle of the unseen world. The
"wretched wee beasties" cavorting innocently under his
lens were later indicted and convicted by Koch and Pas-
teur. Unbeknown to Leeuwenhoek, he had discovered a
vicious and unseen world of killers, now known as bac-
teria, or germs.

The span of time between Leeuwenhoek and Pasteur
was almost 200 years. Only an average lifetime has passed
since Pasteur's experiments, during which practically all
we know about disease and its treatment has been dis-
covered. Our knowledge is expanding at an ever-increas-
ing rate. The pharmacist works with the physician in
bringing newer and better medication into the sickroom.
