**Before he boug... a McCulloch,
George worked in a meat market**

You can do more than fell and buck trees with a McCulloch chain saw. You can limb, slab, cut cordwood and posts. But here's one of the most important things you can do—you can pick up your McCulloch in *one hand*, and carry it easily to the next cut. Try that with any other big-timber saw.

Visiting Hours—With... next few days, stop by our store for a real demonstration of wood cutting.

Summer Rec Program Now Under Way Here

(By Recreation Leaders)

The summer recreation program got under way with around 50 charming, screaming, lovely youngsters penned up in the grade school gym due to an overdose of Oregon mist. To emphasize the success of the first two days, we would like to point out that so far no one has been killed or seriously injured. We are praying for sunshine but rain or shine send your children down and they'll have fun. You know the old saying, "the more the merrier," or "misery loves company," or something like that.

Anyway, here's the program beginning next Monday.

Morning—Little League baseball and playground activities.

Afternoon—Arts and crafts, archery, playground activities, Junior baseball at 3 p.m. and Legion ball at 5 p.m.

Arts and crafts activities for next week will include:

Monday—Textile painting and crayon stencils; Tuesday, coloring and mounting pictures; Wednesday painting plaster of Paris models; Thursday, potato painting; Friday, spatter painting.

Gauges on Pressure Should Be Checked Before Starting With Canning

Now is the time to test pressure gauges—when they need it. Have your pressure cooker gauge tested by taking it off your pressure cooker cover, mailing or bringing it to the county extension office, 3rd floor Albany Court House. The fee is 80 cents for a single gauge or 55 cents for more than one mailed together to Portland. The Charlton laboratories in Portland test the gauges. They attach a note giving the condition of the gauge. They do not repair them. It takes about two weeks to ten days between the time your gauge gets to the office and the time you are notified by card or phone that your gauge is back from Portland.

In order to be sure that canned food are properly processed in the pressure cooker—the gauge must be correct, otherwise you may be deceived by the temperature and time necessary to destroy all spoilage bacteria. Protect your family's health! Send in your gauge today! Be ready for the canning season.

Premium Books for Oregon State Fair to be Out Soon

Premium books for Oregon State Fair will be ready for distribution in about 10 days, it is reported by Mrs. Donald Callahan, editor. Books will be distributed to all 1953 state fair exhibitors. Others desiring the list should write to the state fair, Salem, stating the classification interested in so that the correct entry can be returned with the book, Mrs. Callahan said.

Included in the book are dairy and beef cattle, draft and light horses, sheep and goats, swine, poultry, rabbits, honey and bees, land products, floral and garden, art, foods, food preservation, including freezing and textiles.

Premiums on commercial breeds of poultry have been increased and game birds have been added. There will be more classes in both draft and light horses but a new ruling requires at least three entries in each horse class or the class will not be held.

Garden and floral classes have been arranged in both amateur and professional groups to provide for more entries and wider variety and a few additions have been made in the land products show. Beef and dairy cattle conform to national classifications for the first time, according to Mrs. Callahan.

A "Queen of the Kitchen" contest will be an official part of the food department competition. Fair dates this year are September 4 through 11 in Salem.

Returning Tuesday evening from the 30th annual convention of Lions clubs and Auxiliaries of Oregon, held from June 13 to June 15 in Coos Bay, were Mr. and Mrs. Charles Kelly, Howard Means, and Frank Hunter. They report a wonderful convention, almost reaching the goal of 1,000 attending—the actual count of delegates being 994. The weather was not too good, but most sessions were held indoors, except for the "salmon bake" at the beach, so it did not interfere too much.

Auxiliary members hold separate business meetings, joining the men occasionally for luncheons, banquets, and the district governor's ball.
