Last Word in Farm Machinery

Curly Lawson was first in this area to use one of those roadside vending machines. He's sold milk and eggs in one about a year now, and recommends them highlybut with reservations.

"Mine's the latest model," says Curly, "Built-in refrigeration unit-heater-an automatic sign turner-on for night. Takes any combination of coins."

"However," he warned, "those machines aren't cheap to buy . . . or operate. They run about \$3500. If you're not on the main highway like I am-where lots of city

people pass—you'd better stick to

the old methods."

From where I sit, you have to admire Curly for his pioneering spirit. Of course, there's also plenty to be said for those who tend to stick to the old proven methods. People's ideas differ on the subject - on any subject. Like you may always drink buttermilk with your meals . . . while a glass of beer's the "automatic" choice
