Lifeguard Design in the '56 Ford!

Lifeguard steering wheel has deep-center construction. Rim of wheel is mounted high above recessed steering post... "cushions" your chest against impact in case of accident! New Lifeguard mirror "gives" on impact... resists shattering.

Lifeguard double-grip door locks help keep doors closed, even under impact. And statistics prove that if you stay inside the car in an accident, you're twice as safe! These safety locks resist stress from two directions—instead of the usual one.

Optional nylon seat belts offer you 3-way security. They give your children far more protection in case of sudden stops in everyday driving... they help keep passengers in their seats in the event of an accident... and they make driving far less tiring.

Optional Lifeguard padding on instrument panel and sun visors not only reduces possibility of injuries, but in many cases prevents them altogether! It's five times as shock absorbent as foam rubber. Come in and see all Ford safety features soon.

The fine car at half the fine-car price!
