Bids Asked for Bridge Across North Santiam

Bids have been invited by the Portland District, Corps of Engineers, for construction of a steel girder bridge with concrete piers and deck across the North Santiam River at Detroit Dam reservoir.

The new bridge would replace the present one which failed last summer. It has since been used for foot traffic only.

Construction of the new bridge calls for four 96-foot long girders from the old Deschutes River highway bridge which was removed during relocation work made necessary by construction of The Dalles Dam on the Columbia river.

Bids for construction of the new bridge will be opened at 2 p. m. July 23. Work must be completed in 150 calendar days.
