**Food Budget
Can Be Cut
By Planning**

You can save your family budget dollars every week by planning before you shop, advise extension specialists at Oregon State college.

Saving a few cents on an item may seem insignificant, but in time it adds into dollars. According to Zelma Reigle, OSC consumer marketing specialist, on the average one-fourth of the family income, after taxes, is spent for food. Many families, she believes, could whittle the food budget with some of these money saving practices.

Learn to spot a real bargain. Mark-ups vary on food within a store. Some items are known as "footballs" because they are sold at cost or less to lure customers into the store. Most common "footballs" are canned peaches, applesauce, tomato juice, frozen orange juice, shortening, smoked hams, baby food, sugar, evaporated milk and tomato soup.

Buy foods in-season and plan meals around them. It pays if families with freezers stock up on food "specials" such as meat or frozen foods. Price differences between egg sizes also vary at certain times during the year. Sometimes small eggs are better buys than large. Shoppers may obtain free egg buying guides at local county extension offices.

Save on meat purchases; buy less popular cuts. Shot ribs, shank end of ham, shoulder cuts, beef chuck and variety meats, are often lower priced than more popular steaks, chops and roasts, she notes.

Buy food for intended use. Imperfect apples make tasty pies and sauce, and are cheaper than top quality, showy apples. Tomatoes for juice or catsup, and fruit for jams and jellies need not be top quality.

Read labels, compare ingredients and price per pound with cost per serving. Compare prices among fresh, frozen and canned foods. At certain times some vegetables and fruits are cheaper canned than frozen, and some frozen are cheaper than fresh.

Consider the cost of convenience, shoppers are reminded. Many prepared foods cost more than the cost of ingredients. Shoppers often pay premium prices for convenience and time saved. Some mixes, such as cake and biscuit, are cheaper to buy than to make the baked goods from "scratch." Salad dressings are usually cheaper made at home.

Plan a flexible shopping list before you buy. Maintain an "up-to-date" shopping list handy in the kitchen. Build the list around meat, fish, poultry, dairy foods, fruits, vegetables, bakery items and staples.

Avoid at-home waste. If only 5 cents is wasted at every meal, \$54.75 is thrown away every year, Miss Reigle points out. Cook all "protein" goods—eggs, cheese, meat and poultry—at low temperatures. Plan tempting ways to use leftovers while they're still fresh.

Attach a paper cup to your food chopper at point where juice drips off. A small pipe cleaner helps hold the drip-catcher in place.
