"How about one of those wonder drugs?"

"I've got a cold," the man said, and he went on to ask for a "wonder drug." The pharmacist sold him some aspirin and advised him to see his physician. As it happened the aspirin fixed him up fine, but the point is this: Pharmacists are not physicians. We work with doctors, providing the drugs and medicines they prescribe. We have a professional knowledge of the powerful new "wonder drugs," so we know how important it is to use them correctly. Please do not feel offended when your pharmacist refuses to sell you a certain drug. It is for your protection and in the best interest of your good health. Always see your doctor when potent medication is required.
