### Camp Fire - Bluebirds Plan to Plant Trees

Mrs. Albin Cooper entertained members of the Mill City Camp Fire leaders association at her home Tuesday morning with a coffee. Mrs. Marion Minty of Salem, field director for the Willamette council, who usually attends the meetings was unable to be present because of weather conditions.

Mrs. Wendell Heller presided at the meeting when plans were discussed for the Father-Daughter banquet to be held in late February. The group also went on record as favoring another tree planting project similar to the one held two years ago when all Camp Fire and Bluebird groups participated in planting seedling trees. Mrs. O. H. DeWitt, Conservation chairman for the Women's club will make arrangements for the project.

The Campfire girls will also plant a tree at the new Santiam High School in observance of their golden jubilee year; this is a nationwide Camp Fire program this year.

The Association voted to give each group a sum of money so that more craft work and knitting and weaving may be accomplished.

Mrs. Delbert Gortoth was appointed to arrange for a "clean-up" day at the Lions Club cabin where the various groups meet. Parents will be contacted to assist with this work.

The February meeting of the Association will be held at the home of Mrs. Al Pakula.

If your family is small, ask the meat man to cut the leg-of-lamb with a roast from the butt end, stew from the shank end and then two tender steaks from the center.

Here's what can happen to your roast, regardless of how much you pay. If you roast a 12 1/4 pound roast at 450 degrees, you end up with about 8 1/4 pounds. If you roast the same size at 300 degrees, you'll have about 10 1/4 pounds to serve. The secret is the low temperature.

## Money-Saving Shopping Hints Given for '59; Prices Viewed

Learn to recognize a good buy, shop sales, and be willing to forfeit convenience on certain items, and you can save money this year.

Mrs. Elvera Horrell, extension economist at Oregon State College, reports that the prices they paid for goods and services last year climbed faster than incomes. However, families can pare spending with lessons from the past year when they recognize where the dollar has the greatest spending power.

In October 1958, it cost a Portland shopper \$1.02 for the same amount of goods and services that \$1 would buy a year earlier. Transportation costs climbed the most. It cost 8 cents more to buy \$1 worth of transportation, 3.7 cents more for reading and recreation, 3 cents more for food, 1.8 cents more for personal care, and 1.2 cents more for medical care. However, in October it required only 99.4 cents to buy the same amount of clothing that a dollar bought a year earlier.

In the year ahead, Mrs. Morrell says it looks as though shoppers might receive a few "breaks" even though rents may climb, and prices on maintenance and repair jobs may be higher. Clothing prices will probably stay about the same, food prices should be a little less, and household equipment may rise only slightly, if at all, in 1959. Here are money-saving tips based on these reports from college specialists.

Food.—Learn as much as you can about wise food buying. Buy foods in-season. Make a general menu plan before you shop and reduce "impulse" buying. Watch prices when

you shop so you know whether advertised price is really a "special."

Figure food prices on a price per serving basis and plan accordingly to family likes and dislikes. About a third of the food dollar goes for meat, including poultry, so use less expensive cuts frequently. Buy whole chicken and save 4-10 cents a pound by cutting it up yourself. Make sandwiches from sliced cold roasts and poultry. They're less expensive per pound than packaged cold cuts. Use meat supplements such as fish, cottage cheese and other cheeses, and eggs often.

Clothing.—Take advantage of seasonal buying. January and August are usual "white" sales months. Check workmanship, washability and quality features on all clothes before you buy. Stick to basic styles instead of fad or high fashion clothes. Women who sew may find it cheaper to make some of their better dresses at home and buy others, such as cotton housedresses.

Transportation.—Walk to work instead of ride. Form transportation pools for rides to work, downtown, or for recreation purposes.

Recreation.—Cut down on the number of "admission" activities you attend.

Personal care and services.—Curb your desire for luxuries. Ration the amount of "paper" conveniences such as paper plates, cups, towels and tissues used. Buy economy size toothpastes, shaving creams, lotions and soaps. Redeem coupons attached to these for money. Learn to do simple repair jobs yourself. Don't ask for "rush" service. Exchange baby-sitting services with your neighbors.
