**How do you  
tell a  
drunk?**

The man was acting strangely. You know what people thought. But the neighborhood pharmacist had a hunch, took a close look, gave the man sugar. Then he called a physician who found the man was in insulin shock. Too much insulin, not liquor. Without prompt treatment, he might have died. This story illustrates the potency of modern drugs. Before using powerful drugs you should see a physician and then follow directions to the letter when taking them. There's a happier moral. Without modern drugs, the diabetic in this story wouldn't have had a life to save.
