To clean narrow neck vases which can't be washed with a dish cloth or bottle brush, give this idea a whirl. Put a few grains of raw rice in the vase with suds and shake well. The friction will loosen the soil. Do this twice - empty and rinse. Finally "sweeten" it with a small amount of baking soda in the rinse water.

If a child gets an object in his nose, never try to remove the object yourself; you may push it farther up the nose. Ask the child to blow gently; this may dislodge it. If blowing doesn't work, call a doctor.

IT'S YOUR LAW

Respect for Law Makes Democracy Live

A COURT LOOKS AGAIN

We look to our courts of appeal to correct the errors of lower courts. But what court corrects our Supreme Court's errors?

Often the Supreme Court itself: It may reverse its own decision.

For example, the other day the U. S. Supreme Court forbade a military court to try overseas civilian employees and their dependents. Such courts can try men and women serving in the armed forces. But how about civilians?

Under the Constitution they have a right, which Congress cannot allow the military to take away, to a jury trial, to a grand jury indictment, to bail, and to the right not to testify against themselves. In short, they have the same right to a fair trial as any other civilians—as set out in our Constitution.

This Supreme Court decision follows an earlier one in which our highest court had changed its mind. In that case an overseas military court had convicted a civilian, a woman, of murder, and the Supreme Court had upheld it. A few months later the Court had some second thoughts and took the rare step of looking again at its own ruling. Reversing itself, the Court found that the

accused woman had been convicted unconstitutionally.

Said one Supreme Court Justice: "We reject the idea that when the United States acts against citizens abroad it can do so free of the Bill of Rights."

This decision creates a problem, all right: How can our courts handle any of the 25,000 civilian workers and 450,000 dependents abroad who may commit crimes? Would the decision, as the Justice Department argued, upset "delicate arrangements" with other countries which had turned over our citizens for trial in our own military courts?

Perhaps so. Yet, this regard for civilian rights may well mean (1) letting foreign courts try U. S. civilians and dependents, (2) letting them go unpunished for their crimes, or (3) bringing them back home for trial.

This presents a problem for the law makers: How to provide a constitutional trial for our far wandering citizenry these days.

Note: Oregon lawyers offer this column as a public service. No person should apply or interpret any law without the aid of an attorney, who is completely advised of the facts involved. Even a slight variance in facts may change the application of the law.
