Local People Enjoy California Vacation

The Kelly family enjoyed an unique Christmas this year with both young folks and adults saying it was one of the best. From the young folks point of view sun-bathing and a dip in the ocean on Christmas day was new and different and the adults in the crowd of 15 got out of a lot of home decorating and baking.

The group rented a large home on the beach at Balboa, Calif., with arrangements all made for them by the family of a classmate of Jeanie Kelly at the U. of O. Mrs. Carl Kelly said that when they arrived even the kitchen shelves were stocked with "makings" for several meals.

March of Dimes Plans to Double Birth Defects and Arthritis Centers

Announcing plans to double the present number of March of Dimes birth defects and arthritis centers in the nation, the world's most successful voluntary health organization this week launched its traditional January fund-raising appeal.

Basil O'Connor, president of The National Foundation-March of Dimes, which financed development of both polio vaccines, said the goal this year would be \$45 million, "a sum our medical and scientific advisers agree we can wisely use to combat the ravages of these crippling. This sum would apply to patient care, research, professional and public education."

The March of Dimes now supports some 77 birth defects and arthritis treatment centers across the country. According to Dr. William S. Clark, director of the medical department of The National Foundation-March of Dimes, the national dimensions of the health problems posed by birth defects and arthritis "have grown to a point where this nation requires at least 100 centers for birth defects and 50 for arthritis."

"Through the generosity of the American people, we will build up our chapter and center programs across the United States to meet their needs. Our offensive against both these crippling afflictions will be redoubled in 1964."

Leading in this offensive will be the members of the 3,000 March of Dimes chapters in the nation plus the volunteers they enlist—an expected army of two million people. The campaign continues throughout January and culminates with the Mothers' March during which some 15 million homes are visited from coast to coast. In addition, a total of 35 million "mailers" are distributed nationally to inform families of the health aims of the March of Dimes and they also serve as a means of returning contributions to local chapters. The herculean task of addressing these envelopes regionally is uselessly assumed by volunteers—thousands of teenagers, homemakers, grandmothers.

Mary Lou Graves, the 1964 National March of Dimes Child

campaign will be the cross-country tour of winsome Mary Lou Graves, 5, of Flint, Mich., who was born with an open spine, since repaired, and who developed excess water on the brain, another birth defect which has now rectified itself. Mary Lou, however, is paralyzed in the legs but moves with surprising alacrity with leg braces, crutches and her wheelchair. In addition to vivacious Mary Lou as the National March of Dimes Child, many states, counties and municipalities across the country designate their own March of Dimes Child symbolizing the aims of their local campaigns.

In her travels this month, accompanied by her parents, Mary Lou is scheduled to call upon President Lyndon B. Johnson at the White House and has already visited with many Senator, Congressmen,

Governors and other high officials. The pretty five-year-old has "interviewed" the heads of such influential national organizations as the General Federation of Women's Clubs, the Elks, Rotary, Kiwanis and other service clubs including the American Legion, Veterans of Foreign Wars, Amvets, Catholic War Veterans, Jewish War Veterans and others.

An estimated total of 250,000 infants are born each year in the United States with serious birth defects. This is equivalent to one in 16 births, or 700 children a day. Of the quarter million total, more than 30,000 die, including stillbirths. As to arthritis, the other major health area in which the March of Dimes leads the attack, fully 11 million Americans are tormented by one or another form of this, the Nation's No. 1crippler.
