**a match has a head but no brains**

No one should expect anything from a match but a flame. By its careless handling you risk the lives of your family as well as the destruction of your home and the loss of valuable personal property.

Sensible property owners do two things. They make fire prevention a day-by-day habit. They protect what they have from financial loss by insuring against the peril of fire with a qualified insurance representative. See this agency today, tomorrow may be too late.

Peppermills sometimes stick and are hard to turn. The oil from the peppercorns rust the thread on the screw. Unscrew the mill with a pair of pliers, clean the thread thoroughly with a piece of steel wool—not a soap pad—and rub lightly with a small amount of Vaseline.

**RAMBO'S RAMBLINGS**

Goldie Rambo

Another week of the long hot summer has passed—considering everything things aren't in too bad a shape—including tempers. Yesterday (Thursday) was "growl" day at The Enterprise. I didn't work so the boss got the brunt of people's complaints. However, we do get bouquets now and then, so it evened out. This, like any other job has its ups and downs. Most of us around here are fortunate, as we like the work we are doing.

Must be tough to be on a job and have one breathing down your neck—and hating whatever one is doing, too.

Don is going to like my opinion on this one. I was reading in an AP story the other day where the president had made an appointment to some one to head a department. Upon further inquiry it was found that the work there was non-existent, although the "workers" were still getting their pay.

Well, you guessed it—the department wasn't cancelled out but the people there were set to investigating why there wasn't any work for them. I am sure they will come up with some or a reasonable facsimile.

The big tops are all set to get into operation this week—by that I mean the Oregon State Fair, which will be partly under tents. If the weather doesn't cool off by then it might be a little on the warm side. Haven't heard of air-conditioned tents—but I am behind the times on the latest innovations so they may be.

One nice thing about fairs—they are "family type" events. So many things in the way of entertainment nowadays tend to take the family on different paths. Even though people may spread out after getting on the grounds they always meet again for the different activities which they attend together.

So whether you are a kid, an oldster or an "in-between"—there is something for everyone at the Oregon State Fair.

Aren't problems odd things? Sometimes when we get involved with our own—we think no one else in the world has any. But everyone does—and how much they bother a person depends on their level of ability to absorb or throw them off. Some people worry about a small thing for months—like a dog with a bone. As far as I am personally concerned I've always been able to take the really serious things better than the small nagging problems.

Must be tough to be the head of a state or nation and have their problems, his problems and OUR problems! Most people in that position have the ability to relax completely for a few minutes

whenever they can snatch the time.

Wonder if the Hippies and all the other way-out young people are succeeding in trying to "get away from it all"—think when they come back from their TRIPS the landing would be a little rough.

I was reading an article this week on LSD that ought to make a few of the users think—if they are still able to. Unborn children may now be affected by taking LSD—either through the father or mother. That is a frightening thought and something kids ought to consider when they say "we aren't hurting anyone but ourselves."

Children like everyone else—have their own dreams and escape from the hum-drum of every day chores. But like drivers of cars, they shouldn't do it on bikes.

The other day a youngster about 8 years old was wildly twisting the handlebars on his bike and uttering droning, motor-like sounds. He came careening into a parking lot at a store and a party sitting in a car at "the top of the hill" leaned out and said, "Hey there, you better stick your arm out when you go around a curve and drive in here or you will get a ticket."

The youngster regarded the person in the car scornfully, "look, bub," he said, "you stick your arm out of a space ship and you'll have it ripped off."

And that's that for today.
