## PEOPLE PROTECTORS

Did you ever think of ads as guardians of your individuality? They are, you know.

In a time when the edges are being eaten off our personalities and we're all being reduced to card-index numbers, we need to hang on to some things.

Like our freedom of choice. And that choice is yours only so long as competition and free enterprise and advertising are working for you. Guard them. For they stand between you and a dull and standardized life.
