Who Wants To Be A PTA President?

By Goldie Rambo
According to Mrs. Fred Gruver, chairman of the PTA nominating committee, this long standing and worthwhile organization is in trouble.

It seems that nowadays everyone is too busy, feels inadequate, doesn't want to get involved or perhaps just plain can't be bothered to take on the job of presidency of the PTA. There are, of course, many worthwhile civic, church and fraternal organizations in town that need support—perhaps too many. But through the years the PTA has been a strong link between the parents and the teachers, working together for the good of the students.

About two years ago there was some talk of disbanding the PTA in favor of a Parent Teachers Club. But this was voted down decisively.

Now it seems that everyone thinks the PTA should continue but who is going to steer it? Objects of the PTA besides the communication between teachers and parents, is the giving of a PTA scholarship, donation to the Canyon scholarship, sponsoring of kindergarten, helping finance summer recreation program and the assistance with the annual Senior reception.

There have also been many worthwhile programs presented by the organization through the years as well as support of well-child clinics, measles clinic was Mrs. Alice Morrison, a former PTA Working hard on the recent president and still an active worker for the group.

Mrs. Ellen Rust has been doing a good job as president this year but does not feel able to take on the responsibility of the job for another time.

On April 25 there will be another PTA meeting when Mrs. Gruver said she and her committee hoped to be able to present a full slate of officers. But to date the only positions that have nominees are those of treasurer and secretary.

How about it, would YOU be willing to serve your school and community?

Announcing Chevrolet's new Torque-Drive.

Nobody else offers anything like it at the price. Torque-Drive does away with the clutch pedal. Most of the shifting, too. And for the most economy, it's available exclusively on all Camaro sixes and Chevy II Nova 4- and 6-cylinder models. Look how simple it is. You accelerate in 1st; then shift to Hi for cruising. That's all. If you like, you can even start in Hi. And accelerate from standstill to cruising speed. It's just a little slower that way. The shift lever is conveniently located on the steering column, and there's a selector quadrant with easy-to-read indications: Park-R-N-Hi-1st. Only your Chevrolet dealer has it—clutchless driving at only \$68.65.

The first no clutch one shift \$68.65* transmission
