# Traveling Checks

**BUY LESS**

Do you habitually take a 25 or 30 per cent discount on the personal checks you write?

Many people do... without realizing it. It's the hidden penalty they pay for the privilege of taking their trade to some other city or town.

Take a moment to consider the facts: Only about 70 cents of each dollar we spend goes to pay for the actual goods or service

that we get. About 30 cents of that dollar has to cover the expenses of the community where the sale is made... to pay the people who work there... to return something on the capital invested... to help support the civic facilities such as churches, schools, fire and police protection, road and street maintenance, etc.

Of course, when we spend our

money away from home we get no personal benefit whatever from the 30 per cent of it which goes for community business and social improvement.

Doesn't it follow, then, that when we give checks or money for out-of-town purchases, nearly one-third of the amount goes for something we don't get? Isn't that very much the same as discounting our checks or money?
