RAMBO'S RAMBLINGS

Goldie Rambo

Today — Friday is one of those rare times around here when I have some spare time—a newspaper is something like a home—get one job done and it's time to do it over. Many people think that once the paper is out for the week we all just sit back on our heels—but actually we just start getting ready for the next issue. Or in between there are the many jobs that we print each week, etc. etc.

Looking outside I find it hard to write a cheerful column—think I agree with the old Farmer's almanac writers —this will be a cold winter out Oregon way—makes the old knee joint ache!

'Tis the season to be thankful, jolly and all that stuff—it's hard to be a pollyanna but so many of us never appreciate what we have until it is too late. Guess we all have a tendency to think grass on the other side is greener. Was talking to a woman the other day and she was telling me how much she missed Mill City. But when she lived here it was a rather dreadful place. Such is life—probably always has been and always will be. The trouble is we pass this way but once and can't turn the days back.

So some of you out there in my "Reader land" (I hope you read this once in awhile) think you have problems? Have you given up on what you think life has "handed" to you? Do you think nothing matters—that you can't get anyplace

or do anything? If you think that sounds discouraging—it is rather surprising I find, how many people are despondent for one reason or another.

Well, it's been said that life is 30 per cent what we are, 30 per cent what is handed to us, 30 per cent what we make of situations we find ourselves in, and 10 per cent just plain luck. So people that seem to succeed aren't born just plain lucky—although having that certain little "spark" does help.

But decisions about how to use what we have and what to make of situations are up to us. Robert Louis Stevenson put it this way: "Worthwhile folk's don't just happen. You aren't born worthwhile. You are born with possibilities of BECOMING worthwhile. Your job in this world is to discover and develop the man or woman you ought to be."

While I'm on this rather off-beat subject (not for me—but everyone doesn't enjoy amateur psychology) have you noticed how the average individual is affected by either or their spouses and associates? A day starting with a good warm feeling towards everyone can be soured by someone starting in to snarl. On the other hand a bad day can turn the other way by a kind word, a little praise or word of encouragement. True too, is the fact that our goals and aims can be lowered if we do not receive any encouragement—unless we are one of those determined individuals that plow their way through—come hell or high water.
