## Mysterious Inherited Birth Defect Diagnosed at March of Dimes Center

Mrs. Elliott Bishop Jr. of Hanover, Mass., is certain that her daughter, Mary, is a miracle child.

Every mother thinks her child is special in some way, but Mrs. Bishop may have more reason than most. Mary came into the world with a rare hereditary birth defect so rare that it was four years before her parents found some-one able to diagnose it.

The condition is Ellis-van Creveld syndrome, and Mary suffers from its major effects, dwarfism and congenital heart disease. At birth, doctors doubted she would live more than six weeks.

"We were told that if she survived she would have to be placed in an institution. She would never be able to lead a normal life," Mrs. Bishop says. That was seven years ago.

Today, Mary attends a public school in Hanover where she

school in Hanover where she is a class leader, gets good grades and, despite her short stature, is very active at play. "She even helps with chores around the house," Mrs. Bishop says. "She's a miracle child. She fooled the doctors."

Much of the credit for Mary's progress must go to the medi-cal team at the March of Dimesfinanced Birth Defects Center at Boston Floating Hospital for Infants and Children. This team diagnosed Mary's condition and now supervises her care. She had undergone successful heart surgery at the same hospital the center was estab-

Mrs. Bishop is very proud of her daughter's progress, but she can also tell a parallel story of tragedy in her family. "When Mary was born in October 1961 it was a great shock to us," Mrs. Bishop recalls. "My pregnancy was normal; our first child, Dominica, who was born in 1958, has always been normal and healthy. There had never been any health problems in my family

or my husband's.
"When Mary came and we thought she wouldn't live we almost despaired. At that time the doctors did not know what Mary had. They told me there was only a slight chance that we would have another baby with the same problems. They thought perhaps it would be

Catchable Trout Set for Planting

In Preparation for Opening April 19th

MARY BISHOP, 7, Hanover, Mass., opens wide for Dr. Murray Feingold, director of the March of Dimes-financed Birth Defects Center at Boston Floating Hospital for Infants and Children. Mary was born with Ellis-van Creveld syndrome, which caused heart defects and dwarfism, as well as dental defects.

"Kathleen, our third daughter, was born January 22, 1963. She was like Mary. On April 1st of that year, Kathleen died of heart failure."

In 1965 the Bishops went to the March of Dimes Birth De-fects Center where they were told that Mary had the Ellis-van Creveld syndrome. Once doctors had recognized the condition, they were able to advise

the young couple about their chances of having another baby with similar disorders. "The risk for us was very high, and we decided then not to have any more children,'

Mrs. Bishop says.
Dr. Murray Feingold, director of the Birth Defects Center, points out that chances are

usually one in four that an off-spring will inherit character-istics of the syndrome. This condition is particularly com-mon among the Amish; but, as in the Bishop family, it is

as in the Bishop family, it is not confined to that group.
"When Mary was born, little was known about the syndrome," says Mrs. Bishop. "I think there were only 32 reported cases in the country. Now, of course, more is known and more cases are being reand more cases are being re-

"The information came a little late to help us in planning our family, but I hope others will be able to get proper diagnosis and genetic counseling so they can avoid the kind of

NEW LEGISLATORS RELISH EXPERIENCE

The excitement of challenge, devotion to constituents and respect for the quality of legisators in general are just three points forming a common bond between two new lawmakers

Sen. Sam Dement, 48, represents Coos and Curry Counties in the upper chamber. Rep. Jack Ripper, 48, represents Coos County in the House. Sen. Dement is a Republican and Rep. Ripper is a Democrat, so they can be expected to have their differences f opinion.

Their first-term impressions are similar on many counts, however, and perhaps reflect aspirations and frustrations of all freshman legislators.

One of those frustrations, acording to Rep. Ripper, is the newcomer's handicap of not aways knowing every implication of bills before him. He admits to a lot of night study.

"Old-timers recognize the same old bills, introduced session after session," he says. 'Often they act on them without the extensive debate you might expect-this is sometimes startling."

If the veteran lawmakers lowing certain bills through awards were also discussed. the legislative process, with solons in their opposite chamb-

'I feel I am fortunate in getare cooperating to give this Senate-passed bill their consideration," says Sen. Dement. Similarly, Rep. Ripper feels he is doing well on four bills for his area, passed by the House and now following the route through Senate commit-

Both men receive many letters from home. Rep. Ripper recently mailed out 1,200 questionnaires on the "hot" issues -sales tax, sex education, abortion, 18-year-old voteand says he is getting better than 50 per cent response.

The best thing, he says, is the fact that "one of every 10 respondents writes me a letter. telling me how pleased he is to be asked. It brings people a lot closer to a feeling of participation in the governmental process.'

Sen. Dement, a Myrtle Point cattle and sheep rancher of pioneer descent, agrees that correspondence from the people he represents carries weight in the decisions he

must make. "A lot of form letters come April 13 as part of the monthtion," he says. "It's obvious ly survey on employment and that the signer didn't really partment of Labor, according other hand, a thoughtful perto Director John E. Tharaldson sonal letter prompts me to give

> And to emphasize the value of legislative correspondence: "On one bill, I knew certain people were against it, but that some others from my area were for it. I also knew that the latter had been encouraged and so I couldn't be sure what

they thought. "Their inaction indicated they didn't care, and I voted against the bill.

Both the Republican senator and Democratic representative are apprehensive about the forthcoming sales tax election. Each for his own reasons, voted against referral of the issue, lar survey was conducted in Both express relief that it is going to be finally decided.

Rep. Ripper, a North Bend Junior High School history tax reform action taken by the Bureau interviewer who will, 1965 and 1967 legislative bodvisit local residents are: Mrs. ies. Right or wrong, he says, Patricia H. Baker, 911 Huron "we have at least done more Court, S. E. Salem, Ore. 97302. than the last two legislatures

even with a special session." Sen. Dement serves on five standing committees: the the greater number of House members allows Rep. Ripper to divide his time among only three. Both find their biggest challenge in the intensive, educational work of committee hearings and debate.

An almost equal challenge, they observe, is keeping up with bills not in their own committees. They become informed on these by talking with other lawmakers or government officials, by consulting lobbyists on both sides of a question, or by personally researching current laws or other reference sources.

"We have the top people to explain everything, and this is an education in itself," says Rep. Ripper, who returned to college in 1961 after 17 years in the restaurant business.

"It is a fascinating experience-the first time I can remember where I want to get up extra early and chop down here to work.
