Recreation Report

The Detroit Ranger District recreation report indicates that caution should be taken on the Leone Road S921 that turns off the Breitenbush Road S46 at Cleator Bend, as travel is restricted due to logging operations.

On August 3, construction on a new water system at Riverside Campgrounds began which necessitates shutting off water periodically without advance notice. It is probable that the system will not be completely operative until after the current camping season.

Many wild flowers are now blooming in Jefferson Park such as Stonecup, Douglasia, Firewood and many other species and colors of the Heather family.

Pamella Lake Trail 3439 has had spring maintenance. This is a 2.1 mile trail that passes through stands of old-growth Douglas-fir and parallels Pamella Creek. Pamella Lake is in a deep canyon and the rising mountains make a beautiful view. Fishing has been good for native cutthroat trout, but the fish are small. Trail 3439 is an access route to the Mt. Jefferson primitive area and the Pacific Crest Trail.

It's Your Law

Respect for Law Makes
Democracy Live
Attractive Nuisances

Repeated tragedies by now have pointed up the potential deadly peril of abandoned ice boxes and refrigerators to small children.

But many other hazards, less publicized but potentially as likely to kill or injure youngsters, still are not uncommon. Some of these the law classes as "attractive nuisances"—potential perils attractive to children.

Persons who maintain such "nuisances" may, in certain circumstances, be liable for youngsters' injuries — even sometimes in cases where they have specifically warned the children about the danger.

Here is how the court defines the Law.
One who maintains an instrument or condition which may reasonably be expected to attract young children and to endanger them has a duty to take the precautions that a reasonable prudent person would take to prevent injury to the children.

Examples from cases in which the court has applied the law include an insecurely fastened railroad turntable, untended explosives left where children were known to play, easily accessible machinery and an untended scraper vehicle left temporarily on a school ground.

All potential dangers to children are not, of course, regarded as nuisances which would make the owners liable. The court says the instrument or condition must be dangerous in itself—that is, likely to result in an injury; it must be alluring to young children; the children must be too young to recognize the danger; the danger must be where children play or could be expected to play or attracted out of curiosity; and it must be reasonably practical to prevent access to the

danger or to eliminate it without hurting its reasonable purpose.

(This column is written to inform not advise. Facts may change the application of the law.)

Waxed windows can be dangerous if it is reported. Many car washes provide a spray wax service. What happens is that the wax also falls on windows and other glass areas, which normal windshield washing will not remove, and you get a mess of smears. The solution: Use a cleaner that contains either chlorine or ammonia.

Don't cause a rear-end crash by following too closely. At 60 miles an hour it takes at least 366 feet—or 23 car lengths—to stop under GOOD conditions. Keep alert to traffic both ahead and behind you.

Double Tax Days

LOVE TAXES? You'd think some of us do... the way we pay our home community taxes, and then rush off to other cities and towns, to help those people pay theirs.

You know, part of every dollar spent in any community goes naturally to help defray that community's overhead expense—for city, county, and school facilities. More trade volume means smaller direct tax bills... trade volume which leaves a community, leaves bigger tax bills... for every individual who lives in that community.

But, of course, Taxes are fun. Double your fun by doing your shopping where you pay part of the other fellow's taxes, too.
