Women's Missionary Council meets the 2nd and 4th Tuesdays at 10 a. m.  
Anyone desiring counsel and prayer may call Pastor Jepsen.

# MEHAMA

**Mrs. John Teeters**  
Mr. and Mrs. Earl Hotaling and daughter, Mrs. Patrick Kahue, of Honolulu, who had just returned from an Alaskan trip were guests several days last week at the home of Mr. and Mrs. John Shafer. While here they were dinner guests at the home of Mr. and Mrs. Giles Wagner. The Shafers and Wagners were house guests at the Hotaling home when they were in Honolulu.

Mr. and Mrs. Alvin Griffiths returned home September 15 from a few week's trip when they visited with relatives in Kansas and Nebraska and also in Colorado where they attended a wedding of a granddaughter on their way home.

Mrs. Lee Brant of Macleay visited Sunday afternoon at the home of her mother, Mrs. Jennie Moe, and her sister's family, the Larry Kimseys.

Mr. and Mrs. Mel Pankratz and children of Dallas were guests Sunday at the home of Mr. and Mrs. Grant Smith and at the Bruce Matthis'.

Mrs. M. V. Frame returned home Thursday from Nehalem where she had spent several days visiting with friends and relatives.

Mr. and Mrs. Chris McDonald came from Crane Prairie Friday afternoon and were guests for several days at the home of their daughters, Mr. and Mrs. Harold Longfellow and Mr. and Mrs. Donald Teeters and Bruce. The McDonalds, Longfellow, and Teeters were dinner guests Sunday at the Don Stensland home in McMinnville.

Mr. and Mrs. Merle Johnson of Galice visited several days recently at the home of his mother, Mrs. Harley Johnson, and with other relatives here.

Mr. and Mrs. Howard Fletcher returned home September 16 from a 10-day trip to California where they went to take their grandson, Troy Maestas, who had spent the Summer here, to his home at Oxnard.

They also visited with the Dale and Richard Fletcher and their families at Huntington Beach and Garden Grove. The Fletchers also went on a "Lions Country Safari" while there. This is a trip through a wild life refuge in the Laguna hills where all the animals are in their natural environment as near as possible.

Mr. and Mrs. Web Morrison of Stayton were Sunday guests at their home of her brother-in-law and sister, Mr. and Mrs. Leonard Wallen.

Walk as children of light. —(Eph. 5:8)

When we have a need for security, we often reach out for something in our environment to give it to us. Yet true security is found within. It is found in our inner strength, our inner oneness with God. God's light is with us, so let us live by it.

## ENERGY CRISIS IS AS SERIOUS AS THE ENVIRONMENTAL CRISIS

When he was in Oregon last month, Sec. of Interior Walter J. Hickel called electricity the best road to a clean environment.

And at the same time he expressed disappointment that so few people appear concerned about a shortage of electrical power generating facilities. The "energy crises," he said is just as serious as the environmental crisis.

In Oregon—traditionally the land of cheap and abundant hydro-electric power, an impending energy shortage is especially hard to believe. But it's coming unless the widely publicized Bonneville Power Administration's hydro-thermal mix becomes a reality. This plan calls for a comprehensive joining of forces by public and private power agencies and utilities to provide a mixture of energy sources necessary to satisfy known power requirements during the Seventies and the decades immediately following.

The hydro-thermal mix involves long-range planning, financing and construction of electric power generating facilities on a precariously tight timetable. Already that schedule has been disrupted because voters withdrew approval of Eugene Water and Electric Board's plans to construct a nuclear power generating facility.

The action was a severe blow to BPA's hydro-thermal program. All utility people, both public and private, firmly agree that one more delay in construction of a million-kilowatt thermal plant in this area will heighten the Northwest's mid-Seventies power crisis to the point of industrial brown-outs will become a certainty.

And now comes word of an Atomic Energy Commission hearing, probably in November, on Portland General Electric's Trojan nuclear plant near Rainier. The hearing is described as the last step before AEC issues PGE construction permit for Trojan.

Granting of that permit will climax four years of tedious preparation by PGE—but only the mid-point in the period between original announcement of intention to build and the time the first power is generated.

PGE announced its Trojan plant in February 1967. Thousands of man hours have gone into design efforts, consultation with the many agencies involved in nuclear plant construction and operation and to learn answers necessary to meet requirements of AEC and the state.

Some pre-construction site excavation began last March and will be complete next

month. The work was done at PGE's risk and was necessary to maintain the tight completion schedule. The plant is to be "on the line" in September 1974.

The Advisory Committee of Reactor Safeguards—an independent consulting board of scientists and engineers, reported favorably on the Trojan project last July.

Requirement of the Oregon Environmental Quality Control Commission have been met and that body issued a waste discharge permit a year ago. Hearings already have satisfied federal water quality requirements and Oregon's Water Resources Board has indicated it will not oppose the project.

Back on the federal level, the Fish and Wildlife Service has indicated satisfaction with water intake structure and discharges if minor modifications are agreed... if necessary after the plant is in operation.

No roadblocks are expected from other agencies.

Meanwhile, Westinghouse Corporation is building the nuclear steam supply system. General Electric is at work on turbine generator equipment and contracts have been signed for fuel, fuel processing and re-processing.

Lawrence Halprin & Associates of San Francisco have completed a master land-use plan for the 630-acre site, including a detailed recreation facility. Wolff, Zimmer, Gunsul, Frasca & Ritter of Portland is designing an information center. Bechtel Engineering is engineer-architect and Pietro Belluschi is consulting architect for the entire project.

When completed, Trojan will represent an investment of more than a quarter billion dollars. It will produce 1.1 million kilowatts of firm electrical power for the Pacific Northwest—more than double the capability of Bonneville Dam. Peak construction crew will be about 1,000 men and operating force will be about 60.

PGE is sponsoring and operating company with Eugene Water & Electric and Pacific Power & Light owning lesser undivided interests.

A growing number of concerned Oregonians are mustering support for Trojan and the hydro-thermal mix power generating concept. Their goal is to educate environmentally conscious people of the fact electricity is the best path to a clean environment.

And, to convince those same people that our energy needs are valid before industrial brown-outs lead to payroll blackouts!
