The units, which include four new classrooms, a biology lab, a library unit, and a rest-room building were purchased to serve an anticipated 58 per cent increase in enrollment this fall.

They will provide an additional 11-thousand square feet of floor space, with the library unit the largest at just over five thousand square feet.

The classrooms will each seat 44 students; the biology lab includes 24 student stations, and the library seats about a hundred persons.

Workmen are now pouring the foundation forms, and a crane will be brought in Monday to put them in place.

LETTERS TO THE EDITOR

A SALUTE TO MILL CITY

Sparks, Nevada
Mr. Don Moffatt
Every week I look forward to receiving my copy of the Mill City Enterprise. I enjoy reading every page thoroughly and even though I am not there, I can keep up on all the news and happenings in the community that I love so very dearly.

When I read my paper, I imagine myself sitting on Granny and Gramp Kerrs' front porch, drinking my beer with my boots and bib overalls on, watching the log trucks roll by and listening to Art tell me some wild tall story about the woods, or even some wilder taller story about fishing.

What I'm really trying to say is this. I hope all the wonderful people in Mill City realize and appreciate the beautiful, peaceful, and serene environment in which they live. This is the feeling that my wife Bessie and myself take with us every time we leave Mill City after visiting our loved ones (Granny, Gramps, and Wayne Kerr). I only hope that one day soon we can become permanent residents of your community and contribute in some way towards keeping Mill City yours and our favorite city.

Death Toll High On State Highways

Oregon recorded its highest traffic death toll so far this year in July when 66 people died. The July toll, 21 more than in July last year, brought the state's seven month traffic count to 350, according to the Motor Vehicle Division.

That means the state still shows a slight decrease in traffic deaths this year, but the margin of decrease has narrowed to only 11. At the end of the first half of the year, deaths were 28 below the comparable 1970 period.

The division said July saw 10 pedestrians and eight motorcycle riders killed in traffic.

Failure to use seat belts was noted in 21 deaths in which the seat belts were in the car but not in use at the time of crash. Twelve of these victims were thrown from their car and nine others died as a result of injuries received inside the car.
