**Are you Getting Cut Short By your Rotary?**

Many people are. They're not getting full width cutting performance from their mowers. If you buy a 1973 Jacobsen Turbo-Vent rotary you won't have this problem! All nine models give full width cutting performance along with these other advantages: Smooth cut, Better bagging, Anti-clogging, and power-propelled models with Pace Command variable speed drive let you choose your walking speed for more comfortable and safer mowing. We have the whole Turbo-Vent story. Come in. We'll be glad to share it with you!

Turbo-Vent prices start at **\$124.95**  
 All Jacobsen mowers bearing this OPEI label meet or exceed the B71.1-1972 safety specifications published by the American National Standards Institute.

Spending several days at the home of Mr. and Mrs. G. J. Geston are Mr. and Mrs. Braxton Fouts from Cottage Grove.

Spending the Memorial Day weekend in the Prineville area were Hollis and Catherine Turnidge. They were joined by Ed and Pat Beesley of Snohomish, Wash. Carolyn Brejcha and Dawn Risner of Beaverton and of course me, also three grandchildren, two great-grandchildren which really made it a family reunion. Twenty-one in all. The men did some fishing and had a little luck, the rest of us did a lot of hiking around the area and worked on our suntans.

Thursday, Jere South's second grade and Kay Bell's third grade students walked from school to Ted's Drive-in where Earl Moreland treated them to ice cream cones.

The Gates News Column is still needing a new writer and as you can see by the past couple of weeks, needs it badly. Come on someone, volunteer. I plan on doing a lot of camping this summer and it is hard to get the news in on time when you aren't home.

My niece, Susan, found a job while here on her two weeks vacation, so is staying on with me, and there are lots of places she hasn't seen so this is a good time to show them to her.

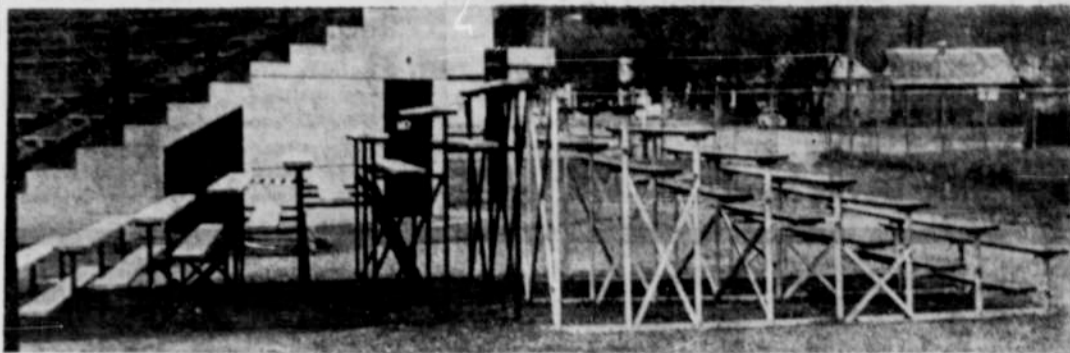

The above picture is of Curtis Griffin with his 25 3/4 lb. salmon caught Monday just below the bridge at Mill City. It measured 42" long and it took Griffin and Tom Hubb 90 minutes to land him.

**Construction Class At Santiam Worked On Many Projects During The Year**

The Santiam High School construction class, under the supervision of Don Williams, to build an 18'x50' roof behind the custodians' shop. The rafters were made out of 2x10's covered with 1/2" sheathing

and rolled roofing. The students planned last spring in Mr. Twede's drafting class, and a building permit was obtained in about two months: Craig

Blackburn, Russell Budlong, Joe O'Brien, Jerry Raines, Bill Dennis Cox, Dale Davenport, Roy Middleton, Jim Mansfield, Tippet, and Bob Tippet. The second project was the construction of three sections of portable bleachers for the football field. After the plans

were drawn up by Mr. Twede, Miss Parent's seventh period bookkeeping class was asked to help secure bids for the construction. The following girls eagerly took time out from the regular bookkeeping assignments to write letters asking for estimates for the building

materials: Betsy LaMunyan, Karen Howell, Linda Long, Starla Neal, Cheryle Lawrence and Diane Wills. These girls worked in teams, wrote a minimum of three letters asking for bids for each of the various types of materials. After receiving the estimates from the firms, the girls then went through them to determine where the materials could be purchased at the best price.

A summary of items, cost and the firm bidding was then presented to Burton Boroughs and the Booster Club for their consideration. The girls also gathered the cost factors for the construction of the added storage area.

The Santiam Booster Club furnished and paid for all the materials that went into the bleachers. The students obtained a lot of layout and welding experience as the frames were made out of 1 1/2 x 1 1/2 angle. The seats and foot supports were made out of 2x10's. Each section, 12 feet long, will accommodate approximately 60 adults.

The first section was available for use at the football playoffs. Before the bleachers were entirely completed the school was half over, and the classes changed so that only seven students continued to work on the project.

These students were: Craig Blackburn, Dennis Cox, Jerry Raines, Bill Tippet, Bob Tippet, and two new students who joined the class, Gary Hennes, and Gary Taylor.

At this time, planning for a carport to be built at Mr. Borough's residence, was underway. The students did a good share of the planning and estimating material costs.

Once the building permit was obtained, the class started building trusses in the shop. These trusses were completed the last part of February.

Prior to spring vacation, six concrete footings had been poured to support the carport's 4x4 posts. Another truss job was then started so the students could work indoors during the bad weather. Every nice day the students worked on the carport job, and at this time it is almost completed. Mr. Boroughs furnished all of the material, and has given the shop a new 7" skil saw for the boys' efforts. The construc-
