An Unfaithful Employee.

Some few weeks ago W. A. Sherlock engaged a herder named Olney to take charge of his sheep on the mountain range. One day last week the herder came to town, it is said, and when he left he had a good-sized jug of "reduye" with him. Presumably, when he reached the range again he found the band of about 4,000 sheep scattered, became frightened at the result of his negligence, and, fearing the wrath of his employer, "skipped the country" as the saying goes and has not since been seen. Mr. Sherlock was apprised of the man's actions, and started last week to try and gather the scattered band. Monday he had found all but 17 head alive, and in his travels found 50 head that had been killed by wild animals. The herder did not wait to get the money due him, but went hence.
