LAKE CO. EXAMINER.

VOL. XXI

LAKEVIEW, OREGON, THURSDAY, SEPT. 6, 1900.

NO. 35.

PUBLIC SCHOOL

The 1900 Term of Lakeview Public School Begins Sept. 17th.

Advice From Principal to Parents and Pupils That Should be Heeded--List of Supplies Needed In Each Grade--Classification.

The Lakeview public school will open September 17th.

NEW SCHOLARS.

The Principal will classify all new scholars except those entering the lowest class. Such scholars should bring their certificates from the school last attended and the books studied. Scholars of the lowest class will be admitted only in September and January, at which times only beginning classes are formed. Scholars entering the lowest class must be at least six years of age.

TUITION.

Non-resident pupils will be admitted to their proper grades, but must pay tuition in advance to the Principal. The rates are as follows: First and second grades, 50 cents per month; third and fourth grades, 75 cents per month; fifth and sixth grades, \$1 per month; seventh and eighth grades, \$1.25 per month, and the high school, \$1.50.

THE ROOMS.

The various grades will occupy the following rooms: High school students, the south room, upstairs; seventh and eighth grades, the north room, upstairs; fifth and sixth grades, north room down stairs; third and fourth grades, the south room, down stairs; first and second grades, the new addition on the west.

ASSIGNMENTS.

Principal, J. R. McCormack; seventh and eighth grades, Miss Gertrude Vernon, fifth and sixth grades, Miss Pearl Hall; third and fourth grades, Miss Etta Johnson; first and second grades, Miss Rose B. Coleman.

WHEN TO ENTER.

Students of the upper grades may enter at any time, but it is much better to enter on the first day of the term. The very best time to enter is on the first day of the first term. Those who are a week or two behind in entering have lost greatly. One whole year faithfully devoted to study is worth twice as much as time spent in fragments. Try to be prompt in entering.

INDIVIDUAL WORK.

The effort is made to render the work in the upper grades, as far as possible, individual. The work of each grade is divided into sections, through which the child can progress, by means of home

work, as rapidly as he is able, at the same time all reciting together on daily set work. As each section of work is completed, it is reviewed, so that thoroughness and accuracy are assured. The opportunity offered the children to win promotion to another grade before the close of the term serves as a stimulus to the most earnest effort. The evils of the rigidity of the graded system are largely overcome by this plan, and the quicker children are not necessarily retarded by the slower ones. All are stimulated to do their best. No confusion nor serious inconvenience results in the management of the grades.

SUPPLIES.

Below is a list of supplies needed by each scholar in each grade:

First Grade—First Reader, sponge, 12-inch slate with covered frame.

Second Grade—Second Reader, slate, sponge, ink tablet (letter size).

Third Grade—Second Reader, good pencil tablet, ink tablet (letter size), rubber eraser, No. 1 Spencerian Copy Book (common school course), ink, penholder and pens. Work in geography will be supplied by the teacher.

Fourth Grade—Third Reader, Fish's Arithmetic No. 1, Maxwell's First Book in English Natural Elementary Geography, No. 2 Spencerian Copy Book (common school course), Reed's Word Lessons, good lead pencil, pencil tablet (letter size), ink, penholder and pens.

Fifth Grade—Fourth Reader, Maxwell's First Book in English, Fish's Arithmetic No. 1, Reed's Word Lessons, Natural Elementary Geography, No. 3 Spencerian Copy Book (common school course), pencil tablet, ink tablet (letter size), ink, penholder and pens.

Sixth Grade—Fifth Reader, Maxwell's First Book in English, Fish's Arithmetic No. 2, Brook's Normal Mental Arithmetic, Natural Elementary Geography, Reed's Word Lessons, Pocket Dictionary, No. 4 Spencerian Copy Book (common school course), good pencil tablet, ink tablet (letter size), ink, penholder and pens.

Seventh Grade—Scott's Lady of the Lake, Grammar, Maxwell's Introductory Lessons, Fish's Arithmetic No. 2, Brook's Normal Mental Arithmetic, Natural Advanced Geography, Reed's Word Lessons, Smith's Elementary

Physiology and Hygiene, Barnes' Elementary History, Peterman's Elements of Civil Government, No. 5 Spencerian Copy Book (common school course), pencil tablet, ink tablet (letter size), ink, penholder and pens.

Eighth Grade—Longfellow's Evangeline, Maxwell's Introductory Lessons in Grammar, Fish's Arithmetic No. 2, Brook's Normal Mental Arithmetic, Natural Advanced Geography, Reed's Word Lessons, Steele's Hygiene and Physiology, Barnes' Brief U. S. History, Peterman's Elements of Civil Government, pencil tablet, ink tablet (letter size), penholder and pens.

HIGH SCHOOL.

The Board of Directors have ordered that no classes of less than three pupils be organized in the high school work.

First Year—Maxwell's Advanced English Grammar, Eclectic Physical Geography, Robinson's New Elementary Algebra, Lancaster's Manual of English History.

Second Year—Barnes' General History, Steele's Popular Physics, Waddy's Composition and Rhetoric, Robinson's New Higher Arithmetic.

Third Year—Robinson's Geometry, Smith's English Literature. Bookkeeping will be supplied by teacher. Announcement of additional studies will be made later.

J. R. McCormack, Principal.

WILL RECLAIM 125,000 ACRES.

Expects to See a Big Addition to the Population of Crook, Klamath and Lake.

C. N. Scott, of Portland, tells the Oregonian that the work of constructing the two main canals of the Deschutes Consolidated Irrigating Company will begin at once. Under this system 125,000 acres of land known as "desert" will be reclaimed. The company putting in this irrigation system does not desire to obtain control of the land benefited, and, as the land is mostly in the hands of the government yet, there is ample room for both rich and poor to acquire title to it under homestead or desert land acts. Mr. Scott says the construction of the Oregon Midland to Klamath Falls will give this section an outlet to the south, while the Dalles Southern, soon to be built up the Deschutes toward Lakeview, will skirt along its eastern border.

"I look for a heavy addition to the population of Crook, Klamath and Lake counties as a result of the successful termination of this irrigation scheme," says Mr. Scott.

"Cold Feet."

Red Bluff News: "Mr. and Mrs. Gustav Kraft have returned from their trip through the northern counties. Gus says there was frost in Lakeview, Cedarville and other places nearly every morning. He says, too, that the cattle and mule raising business is in a flourishing condition there."

Everybody went to weddings and the fishing pools last Sunday.
