Deep Bored Wells.

Typhoid fever seems to have been epidemic in different portions of Modoc and Southern Oregon this fall, says the Cedarville Record. Numerous cases have been reported, a number having a fatal termination. At one time Cedarville seemed to have its annual run of typhoid, until about three years ago, when Dr. Meredith advocated and insisted on our citizens digging or boring deeper wells in order to get below the surface water. His efforts in that direction largely prevailed, and, with the sinking of good wells, the cases of typhoid fever became fewer until this fall not a single resident of Cedarville has had a case of it, while many cases have been reported from other parts of the county.
