One reads so much nowadays about sewing machines all being the "best" on earth, that it is scarcely worth while to call attention to The Bartlett. But if you ladies will call at my store I can easily convince you that the drop-head, ball-bearing, easy running Bartlett has no superiors and few equals in the world. Call and see this machine at H. SCHMINCK & SON'S.

### Voice of the People.

"Push It Along."

C. A. Branch, Clover Flat: "I want to assist in pushing The Examiner along, because it is a good thing. Please send your valuable and much esteemed paper to my mother, Mrs. M. E. Branch, Wadsworth, Nevada."

Great Convenience.

J. W. Moore, attorney, Lakeview: "I want to compliment you on the new improvement of cutting and pasting The Examiner as it appeared last Thursday. I was never satisfied with The Examiner as an 8-page paper until now, because of its inconvenience. The new arrangement is splendid."

He Likes It, Too.

E. Lake, machinist, Lakeview: "I don't know just how to put it, but I must say 'Merry Christmas' to you on the new improvement in The Examiner. The cutting and pasting should be appreciated by everybody. If you fellows keep on in this line, making improvements every few weeks, we'll all swell up with enthusiasm and pride of our local paper. It's just fine."

"Wind Engine" Power.

T. E. Bernard, dealer in hardware, vehicles, grain, etc., Lakeview: "You haven't seen our new windmill power, have you? Well; come in and I'll show you something worth looking at. Here you see, on this side, is to be an elevator run by the same power as runs the machinery—power loaned us without cost by the elements; the elevator will raise the grain and dump it into that large bin on top, and within that bin is a cleaner which separates the foul stuff from the pure grain; lower down on a big upright is attached double grinders into which the grain falls from the bin above, and right at hand here will be another bin into which the crushed grain will fall from the grinders and into sacks. We can grind from 8,000 to 10,000 lbs daily with a fair wind, and we usually have all the wind we want for the purpose. Later on we are to make another attachment by which we can run other machinery. The smaller windmill we have been using will be arranged to grind wheat into graham flour. Every piece of machinery is to be run by the 'wind engine.'"

A. Venator Married.

A. Venator, County Commissioner of Harney, and son of Mrs. J. Venator of Lakeview, was married on November 25th, at Boise, Idaho, to Miss Josephine G. Stregel, of Toledo, Ohio. The bride came from her Eastern home to wed the man of her choice. The affair has a romance connected with it. Seven years ago while on a trip East, the two met, and each were impressed with the other. Mr. Venator since became a widower, and a short time ago he thought of his loving friend in Ohio and opened correspondence with her, with the above happy result.
