LAKEVIEW, OREGON, AUG. 8, 1901.

Lake county is not far behind in coming to the front with early fruit. The first apples of the season were in the market last week.

A Kansas man offers to exchange a mule for a wife, which causes an exchange to remark that some men never know when they are well off.

A democratic paper says the rain in the corn state augurs well for the democratic cause, doncherknow. "More rain, more corn; more corn, more whiskey; more whiskey, more democrats."

Last Sunday the weather man showed the people that it could get warm here if it wanted to, but he didn't want to inconvenience anyone by repeating the dose on a week day.

The Younger Brothers, lately paroled from the Minnesota penitentiary, have found employment selling gravestones. They created quite a market for this commodity during the early part of their career.

The greatest river is the Amazon. It is navigable for ocean steamers for 2000 miles from its mouth. At parts of its course one bank cannot be seen from the other; the observer seems to be looking out upon a sea of fresh water.

Miss Ezra Clark, 75 years old, who had not walked for over five years on account of rheumatism, surprised her family. She got the notion into her head that she could walk, getting on her feet, was surprised to find that she could.

What is believed to be a petrified mule's hoof has been found in the Erie mines. The stone has the exact shape of the hoof and is filled with slight depressions, which are numerous on the flat side. These were probably caused by the nails of shoes worn by the animal. It was found in old workings abandoned many years ago.

The Missouri egg factory of Springfield handles about 50,000 dozen eggs a day, all of which are candled or tested before acceptance. About three wagonloads are rejected each day and dumped outside of the city limits. A man living near the dumping ground has collected enough chickens hatched by the unprecedented heat from the eggs thus thrown away to stock a chicken farm.

Creating forest reserves does a grave injustice to the people who are justly entitled to the lands in the public domain, not the foreign corporations who are already fully recognized by this great nation. The evils of the Rainier and Cascade reserve should be ample warning to the people of what has happened, and a sure index of what will happen. Let the weight of the people assert itself.

Isn't it about time the sheepmen of Lake county were taking some action against the land leasing proposition. The opposition has already formulated plans to come before the next congress, and unless the sheepmen oppose it in a resolution to congress, there will only be one side of the question before the lawmakers. A meeting should be called and action taken at once, for after while it will be too late.

The United States treasury was never in a healthier condition than it is at present. On July 31st, when business of the day was commenced, there was in the Treasury vaults \$504,354,297, an increase for the month of \$10,000,000, and for the year of \$74,422,422. This immense pile of gold coin is held against the following items: Gold certificates, \$293,535,689; reserve, \$150,000,000; general fund, off se gold, \$61,818,508.

Many of the orchardists of Goose Lake valley are experimenting on the best kinds of fruit that is adapted to this country, and are improving every year, so that eventually this county cannot be outdone in the quality of fruit raised. C. M. Taylor of New Pine Creek has a very fine fruit ranch, and one that is especially favored from frosts. There may be other places in this valley that are equally as good, and some may be better for ought we know. At present Mr. Taylor is paying more attention to berries. He has a transparent blackberry, which is claimed to be very nice, and also has the celebrated Loganberry, and dueberries. Mr. Taylor raises hasle-nuts on his place, besides he has a number of almond trees that give promise of bearing in a year or so.

**LAKEVIEW LANDS**  
**Wanted in the Burns Land District.**

Renewed efforts are being made to have a part of the Lakeview land district, in Oregon, transferred to the Burns district. A large petition has been received at the General Land Office asking that a tract of land about 60 miles square, forming the extreme southeastern corner of the state of Oregon, be removed from the jurisdiction of the Lakeview office and placed under that at Burns. The signers of the petition assert that the lands in this tract are more accessible to the latter office than to the former. Their allegations, however, are in general terms, and because of their indefiniteness the papers in the case have been returned.

About a year ago many of the people interested in this move petitioned for a similar change, but at that time were concerned in a small tract. The names appearing on the original petition generally appears on the one just received, together with many additional ones. While the assertion is made that this fact is more accessible to the Burns Land Office than to Lakeview, the map seems to so show the contrary to be the fact.

No member of the state delegation appears to be interested in the proposed change, for there is no record of congressional recommendation one way or the other. However, when the petitioners make reply with more details the department will decide upon some course of action.

**Another Reservation to Open.**

Advices have been received at the General Land Office to the effect that by September 1 the surveys of the Fort Hall Indian reservation, Idaho, will have been completed.

Upon the final completion of the survey special agents of the Land Office will be sent out to verify and approve the results. If no errors are disclosed, the Land Office will at once draw up a formal proclamation to be signed by the President, throwing open to settlement all the lands of this reservation not allotted to the Indians.

It is not believed the lottery system now being enforced in Oklahoma will be necessary in Idaho, although some extremely valuable agricultural lands will be thrown open to settlement. The probabilities are that the land will be acquired under the old-fashioned rush. Should everything prove satisfactory to the department, it is believed the Fort Hall lands can be opened some time in October.

**Stock Rates Cancelled.**

The Southern Pacific Company has notified agents of the cancellation of the ten-carloads rates on shipments of cattle, horses and sheep from Winnemucca, Reno, Iron Point and intermediate points to Missouri and Mississippi river and Chicago common points. The cancellation will go into effect August 15th. The rate on single carload shipments of livestock remains the same.

In connection with the withdrawal of the ten carloads rate it is announced that the Oregon Short Line will also cancel its corresponding rate from points competitive to those named.

This order means that stockmen will have to pay about \$14 per carload more upon Eastern shipments than they have been paying under the ten carloads rate.

**A New Town.**

A town of 10,000 people, to be known as Lawton, has grown up just outside the Fort Sill limits within a night. Following the close of the land lottery at El Reno, thousands of homeseekers who drew blanks started for the three points picked out by the Federal Government for townsites in the country, namely, Anardarko, Hobart and Lawton. The majority of the people favored Lawton, which is 25 miles inland, and thousands of people are camped in and about the proposed site, awaiting the sale of lots on August 6th. Already Lawton has 400 temporary business houses including a newspaper, and three streets have been laid out. Every form of gambling known on the frontier is being run wide open.

**Found Dead at Bidwell.**

Last Saturday evening A. H. Chapman of Fort Bidwell left his home and not returning a party was out searching for him all night, and Sunday morning they found his remains lying on the hill above the old post quarters, says the Cedarville Record. He had been ill for some time and was subject to epileptic fits, and it is supposed that one came on and he died. He was quite old and left a family and several children to mourn his loss.

**W**E have many new customers each season coming to our establishment who tell us they always understood that we handled good quality of goods. Our reputation with our customers is not made by any particular line of goods we have, but by the general excellence of every article in our stock. We acknowledge we carry good quality of goods. This refers to our cheaper goods in just the same degree as to those of the very best quality.

In ordering our goods we give just as particular attention to the durability, the substantial make and the superior quality of the low priced goods as we do to the medium and better grades, but our assortment is mainly confined to the medium and better grades.

The strength of our lines is apparent when you look at our stock, and for Spring and Summer we venture to assert that there is not another stock of goods in the country that is equal to ours in its wonderful variety, in its great range of price, in its particular style of everything that we show.

We solicit the business of the people of Southeastern Oregon and can readily convince them that we are the best house to trade with in this entire region.

... BAILEY & MASSINGILL ...

**Men Wanted.**

Graduates easily secure good positions. Beautiful location. Best climate on the Coast. Expenses from \$125 to \$150 per year. Fall term begins September 9th. Write for Catalogue. 29 2m

W. M. CLAYTON, President.

**IT LOOKS**

As if we had experienced a landslide of gloves--such a variety. We'd much prefer they'd be on "your hands." We're going to "palm" them off this week. Better have a "hand" in the deal. Cost nothing to "see."
