Here is an item which shows the push of American farmers: "A single county in western Nebraska, Scott's Bluff, already has 80,000 acres of farm land under irrigation, but her enterprising citizens are not yet satisfied. In conjunction with the farmers of Cheyenne county a colossal irrigation scheme has been projected looking toward the reclamation of another like area. Nearly \$500,000 will be required to complete the work, and part of this money is already in sight. This shows what private push and enterprise will do in absence of state or national aid."
