Pre-Historic Relic.

Last Monday politics was for a time laid aside and public interests concentrated on a remarkable find by Alex Coffer. Mr. C was cutting r ock to be used in building a fire proof vault for Mr. Raker when he dug out a piece of glass-like substance that vernal equinox and to consist of 364 had evidently been fashloned by the hand of man. To all appearances it was the lid of an urn, beautifully cut and about four inches in diameter. The stone from which it wascut was of a soft volcanic formation. The lid, the only part found, was badly shattered from a blow of the axe, but was put together and little doubt remains that it was used by some pre-historic race which lived contemperaneous with the mastadon elephant, giraffe and other tropical animals whose fossil remains are scattered over this country. - Alturns Plaindealer.
