Silver Lake, it is said, possesses the distinction of being farthest away from a railroad of any post office in the United States. While this may or may not be true, Silver Lake is 180 miles from Shandko by the mail route, and about 225 from Terno. From the nearest Southern Pacific station to Silver Lake it is easily 250 miles, and from Ashland via Lakeview, the mail route, it is not less than 400.—Hend Bulletin.

The microbes of lockjaw or of other diseases, the venom of snakes, the virus of smallpox or the vegetable poisons may be successfully conveyed upon bullets from muskets or revolvers. Neither the heat nor the friction in firing destroys them, whether they are on the ball, in the powder, in the wad or smeared within the gun barrel. In the powder they are carried on unburnt grains, which make up 40 per cent in every charge of powder exploded.

Consumption, while also a communicable germ disease, has all seasons for its own; its monthly victims do not vary greatly in numbers, winter or summer, spring or fall.
