### A Case of Blood Poisoning.

Mrs. C. A. Knox had a close call last week. In preparing for a picnic she burned her wrist; she thought little of it, and when a blister raised picked it open. She went to the picnic and when other blisters appeared on her arm she treated them the same way. Next morning, however her arm was giving her some trouble and blisters appeared at different places on her arm, and became quite painful. She decided to come to town and consult a doctor, and when she did, the doctor informed her that blood poison had set in, and that she had sought treatment none too soon.
