The mineral resources of Manchuria, as shown even by the surface scratching that has been done, are simply stupendous. As a wealth giver it may send more to St. Petersburg for the next half century than India will to London.

A novel Belgian method of dealing with smoke consists in drying it by fans into a porous receptacle over which flows a stream of petroleum. The smoke is caught and turned to a gas that gives great heat, and can be used for running gas engines.

There are 10,000 heat units in a pound of average coal, a chunk as big as a man's fist, which, if properly expended, will give a fraction over 236 horsepower. That pound of coal will do as much work—always if properly expended—as 100 men, putting forth their mightiest effort, for four minutes.

French engineers are of opinion that it will soon be necessary to remove the Eiffel tower from the Champs de Mars. The concession for the structure will not expire until 1910, but the tower has leaned so far out of plumb that a slight increase in the depression at one side of its foundation will place the center of gravity outside its base.

LIVER TROUBLES

"I had Thedford's Black-Draught a good medicine for liver troubles. It cured my son after he had spent \$100 with doctors. It is all the medicine I take."—MRS. CAROLINE MARTIN, Parkersburg, W. Va.

If your liver does not act regularly go to your druggist and secure a package of Thedford's Black-Draught and take a dose tonight. This great family medicine frees the constipated bowels, stirs up the torpid liver and causes a healthy secretion of bile.

Thedford's Black-Draught will cleanse the bowels of impurities and strengthen the kidneys. A torpid liver invites colds, biliousness, chills and fever and all manner of sickness and contagion. Weak kidneys result in Bright's disease which claims as many victims as consumption. A 25-cent package of Thedford's Black-Draught should always be kept in the house.

"I used Thedford's Black-Draught for liver and kidney complaints and found nothing to excel it."—WILLIAM COFFMAN, Marblehead, Ill.

THEDFORD'S BLACK-DRAUGHT

COMPOUND INTEREST

The trouble with most advertisers is that they expect immediate returns of large proportions. One prominent advertiser illustrates the principle of advertising in this way:

"The money expended for advertising is the same as if placed at interest. The profits from the advertising are virtually the interest on the investment."

"The sum spent for advertising is properly chargeable to capital account because the resulting good will is something that has value, which, if the advertising has been properly done, can usually be sold for the face value of the investment."

"The rate of interest is determined by the skill with which the investment is made."

"Just as the quickest way to increase invested wealth is by compounding the interest, just so the quickest way to realize results from advertising is to compound the returns."—Advertising Experience.
