**What Shall the End Be?**

Day by day dispatches coming from Russia spread before us the dramatic scenes of what threatens to become a mighty upheaval, such perhaps as the world has never witnessed. The people have ceased to "pray for liberty," and, led by a priest of the church, are showing they know how to die for liberty. Ordinarily the killing and wounding of thousands of people is something to be deplored. But, if the wanton murder of a body of people, composed largely of women and children, led by a man in priestly robes, approaching their ruler as children approach a father, praying for redress and relief, and whose love for his person precluded the least doubt that they would be kindly received, can lead to the effectual overthrow of an Autocracy which has known no motive but lust for power, and sought its object only through degradation of its subjects, then that innocent blood will not have been shed in vain. The Russian Aligarchy will die hard; liberty in Russia will have been purchased at a fearful cost, if such a boon is ever to be the inheritance of those unhappy people.

The ruling class in Russia have not been found in a state of unpreparedness for what now appears to be the beginning of a crisis in their history. They have built a system of government which cares not for the rights of men, and depends for its strength and power to perpetuate its self upon the terror of dungeons, banishment from home and friends, and the repressive power of its Army.

In addition to all these, the very strongest ally of the state in this fierce conflict will be the dense darkness in which the Russian mind is groping.

Whether a competent leadership will be revealed through the enlightened classes, and whether a part of the Army will revolt, are the contingencies which it would seem, must determine the real strength of the movement.

These people cannot, on any of their farms find a Washington, a Putnam nor a Green. Nor, does it seem possible that they could make any advance, whatever, should the army remain loyal to the Czar.

Ominous signs of unrest are shown in Finland. If the Poles can see a reasonable hope of success, they will give their support to freedom cause, and may bring to light the genius that will be able to consolidate the unheterogeneous mass, and lead it to victory. Unarmed, untaught except in the rudest forms of labor; constantly under the observation of most vigilant, keenly watchful spies, with a numerous army ever present at every center of population, under the command of merciless leaders, it does not seem possible for this revolt to become of sufficient solidity

to be really formable as a revolutionary force.

It must, however, produce fruit. Russia can never hush the demand for justice and liberty made by so great a mass of people without making some substantial concessions. Some of the most enlightened have enlisted in the cause of the ignorant masses, and will not cease to agitate until a measure of liberty is gained, for they dare not stop. None can forecast the end. The movement may collapse without attaining to any thing higher than the character of a blind senseless mob. It may end in the birth of a new dynasty, with a constitutional monarchy. Let us hope it will end by securing to the people as large a measure of freedom as they are qualified to enjoy and use wisely, and that the foundation may be firmly laid for advancement of the individual man as his industry and talent may enable him to gain promotion and preferment. Russia is not prepared for democracy.

**Expert Station.**

The United States Bureau of Forestry proposes to establish a timber and stone expert station at the University of Oregon, if the state will furnish the appliances necessary. This would lead to regular reports, published and distributed throughout the country, showing the strength and value of Oregon timber and stone for building purposes.

**A Chance for Speculators.**

SCHOOL LAND.—280 acres of level unimproved agricultural land for sale cheap. Description: 8W 1/2, S 1/2 of NE 1/4 and NW 1/4 of SE 1/4, Section 10, Tp. 39 S., R. 19 E., W. M. This is a desirable piece of land, located in Goose Lake valley and will make some man a good ranch.

**A Government Appointment**

Alex. O. Bradie has been appointed by the President, Assistant chief of the Record and Pension office with the rank of mayor.

Mr. Bradie is now Governor of Arizona, and during the war with Spain was an officer of the Rough Rider Command, and proved the true metal of which he is made.

The Japanese Navy lies in the Indian ocean grimly awaiting the arrival of Russian Baltic squadron, and a great battle is expected to occur in those waters.

THOMAS A. EDISON, the inventor, is mapping out the problems of the future, gives first place to the necessity of fighting the bacteria which give us our diseases. Next to the actual bacteria of disease, the mosquito and flies are the most dangerous enemies of man.

The mosquito with its bite injects into our veins malaria, yellow fever, and other fatal troubles. The fly, with spongy feet, collects the invisible germs of diseases, spreads them over our food and poisons us with typhoid, cholera and other plagues of the human race.

Dr. Pierce, the eminent physician of Buffalo, N. Y., says, "If each person will consider his system as an army of men which he controls as a general, and will see to its proper provisioning and that it has plenty of ammunition in the shape of good red blood, he will be able to overcome the enemy in these germs of disease." Every healthy man has five million red blood corpuscles to every square millimeter of blood. The best tonic for increasing the red blood corpuscles and building up healthy tissue is no doubt Dr. Pierce's Golden Medical Discovery. This medicine has been on the market for over a third of a century and numbers its cures by the thousand.

Many popular patent medicines or tonics are made up largely of alcohol and will shrink the corpuscles of the blood and make them weaker for resistance. What is needed is an alternative extract, like Dr. Pierce's Golden Medical Discovery, made of roots and herbs, without the use of alcohol, that will assist the stomach in assimilating or taking from the food such elements as are required for the blood, also an alternative that will assist the activity of the liver and cause it to throw off the poisons in the blood.

When we have accomplished this we have put the system in a fortified condition so strong that it can repel the germs of disease which we find everywhere—in the street-cats, the shops, the factories, the bedrooms, wherever many people congregate, or where sunlight and good air do not penetrate.

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach, blood and lungs.

Neglected constipation means headache, heart-burn, sour stomach, foul taste in the mouth, biliousness, pimples, and palpitation of the heart. Constipation is promptly cured by Dr. Pierce's Pleasant Pellets. One for mild cases, otherwise two.
