THE GUARANTEED COMPOUND Interest Gold Bond

The Mutual Life Insurance Company of New York . . .

RICHARD A. McCURDY, President
W. L. HATHAWAY, Ore. Manager.

This gold bond differs from any policy written by this or any other life insurance company in the following essential particulars:

1st. The policy is by its terms, payable in Gold Coin. This refers to both the principal sum and the interest.

2d. It guarantees annually, for a specified term of years, 3 per cent in gold on all premiums previously paid.

These credits may be drawn at the time they are made or at any other time, but as long as they are allowed to remain with the Company, they will be increased by 3 1/2 per cent interest, compounded annually, until the end of the said term, and, in the event of the death of the insured, any such accumulated credits will be paid with the sum insured.

3d. At the end of the period during which premium payments are required (10, 15 or 20 years, as the case may be), the Company, if required, will exchange this Bond for a new one a stipulated amount, payable at the death of the insured and, in the meantime, drawing 3 per cent simple interest annually on its par value, PRINCIPAL AND INTEREST PAYABLE IN GOLD COIN. The accumulated surplus or dividend will at the same time be paid in cash, or it may be applied to increase the amount of the new 3 per cent Bond, which will also thereafter participate annually in the dividends of the Company.

In addition to these features which are peculiar to the Gold Bond, it also combines all the advantages of the Distribution Policies of The Mutual Life Insurance Company of New York, such as full participation in the surplus earnings of the Company, Cash Surrender and Loan Values, grace in payment of

premiums, etc.

Full information regarding this exceedingly popular and attractive combination of Investment and Protection for any particular age or amount may be obtained by applying to the Company's nearest agent.

Governor Chamberlain has issued a proclamation naming June 1, 1906, as the time for holding the election on the referendum to the voters of the state of the \$100,000 appropriation bill. This election is a long way off, and some of the institutions that expected to receive support from this bill, and which are in a measure responsible for the forcing of the bill through the Legislature, are already tottering. These are the Normal schools—two of which—the one at Drain and the other at Weston are about to give up the ghost.

Mr. Weed, who came here a couple of weeks ago from Shasta valley, Calif., to look at the XL property with a view to buying, was not quite satisfied with the locations of the various ranches. One of the main ranches of the firm is in Modoc county, near Alturas, another one west of Lakeview, a distance of some 50 miles from the lower ranch, and one at Abert lake, about 40 miles farther north. Mr. Weed seemed to think the property was too badly scattered. Probably if he had been more familiar with the range conditions here he would have been more favorably impressed with the sparseness of the locations. It probably is a little more expensive to operate, but the advantages in being scattered overcome the inconvenience. They have access to more range by the principal ranches being located some distance apart.
