**THE GUARANTEED COMPOUND  
Interest Gold Bond**

**The Mutual Life Insurance  
Company of New  
York . . .**

**RICHARD A. McCURDY, President  
W. L. HATHAWAY, Ore. Manager.**

This gold bond differs from any policy written by this or any other life insurance company in the following essential particulars:

1st. The policy is by its terms, payable in Gold Coins. This refers to both the principal sum and the interest.

2d. It guarantees annually, for a specified term of years, 3 per cent in gold coins, premiums previously paid.

These credits may be drawn at the time they are made or at any other time, but as long as they are allowed to remain with the Company, they will be increased by 3 per cent interest, compounded annually, until the end of the said term, and, in the event of the death of the insured, any such accumulated credits will be paid with the sum insured.

3d. At the end of the period during which premium payments are required (10, 15 or 20 years, as the case may be), the Company, if required, will exchange this bond for a new one a stipulated amount, payable at the death of the insured and, in the meantime, drawing 3 per cent simple interest annually on its par value, PRINCIPAL AND INTEREST PAYABLE IN GOLD COIN. The accumulated surplus or dividend will at the same time be paid in cash, or it may be applied to increase the amount of the new 3 per cent bond, which will also thereafter participate annually in the dividends of the Company.

In addition to these features which are peculiar to the Gold Bond, it also combines all the advantages of the Distribution Policies of The Mutual Life Insurance Company of New York, such as full participation in the surplus earnings of the Company, Cash Surrender and Loan Value, grace in payment of

premiums, Automatic Paid-up Insurance, etc.

Full information regarding this exceedingly popular and attractive combination of Investment and Protection for any particular age or amount may be obtained by applying to the Company's nearest agent,

**Lakeview New Water System.**

Lakeview has a water system now that is unsurpassed in any town its size, and in very few cities. The big fire hose was attached to the hydron Monday, and a stream of water was thrown over 60 feet straight in the air. The stream was also thrown 120 feet down the street.

Water users must realize that with such a pressure they are getting more water in an hour than they could get in three hours before. All should use the greatest care to not waste water in irrigating, as an immense supply could soon be exhausted under such tremendous pressure.

**Wood.**

We will deliver you a load of wood of any length, any day, at any place in Lakeview you desire it.

Our price is \$5 per cord, with discount of ten per cent if ten cords or more are taken and paid for.
