### Beware of Ointments for Catarrh That Contain Mercury

as mercury will surely destroy the  
sense of smell and completely derange  
the whole system when entering it  
through the mucous surface. Such  
articles should never be used except  
on prescriptions from reputable phy-  
sicians, as the damage they will do  
is ten fold to the good you can possi-  
bly derive from them. Hall's Cat-  
arrh Cure, manufactured by F. J.  
Cheney & Co., Toledo, O., contains  
no mercury, and is taken internally,  
acting directly upon the blood and  
mucous surfaces of the system. In  
buying Hall's Catarrh Cure be sure  
you get the genuine. It is taken in-  
ternally and made in Toledo, Ohio,

is daily enacted, in thousands of  
homes, as Death claims, in each one,  
another victim of Consumption or  
Pneumonia. But when Coughs and  
Colds are properly treated, the trag-  
edy is averted. F. G. Huntley, of  
Oakland, Ind., writes: "My wife  
had the consumption, and three doc-  
tors gave her up. Finally she took  
Dr. King's New Discovery for Con-  
sumption, Coughs and Colds, which  
cured her, and to-day she is well and  
strong." It kills the germ of all dis-  
eases. One dose relieves, guaran-

### An Editor's Opinion of the Royal Gorge.

Edyth Tozier Weathered, in de-  
scribing a recent trip over the Denver  
& Rio Grande Railroad, says in "The  
Exposition":

"At last the goal of the ambition  
of years has been reached—marvel-  
ous, wonderful, grand and inspiring  
Royal Gorge is on either hand. The  
only disappointing thing is you only  
have one pair of eyes, while the train  
darts in and out of the tremendous  
chasm. If any who have never seen  
it are wondering how it looks just  
go and see. Thousands have tried  
to describe it, yet every attempt falls  
short of giving the subject justice."

If you contemplate a trip East,  
write W. C. McBride, 124 Third street  
Portland, Oregon, for booklets pic-  
turing Colorado's famous scenery,  
and any other information you may  
desire.

## THE AILING HORSE.

Proper Way to Administer Medicine  
to Sick Animals.

In giving liquid medicines to a horse,  
says the Horse World, have the medi-  
cine in a stout bottle with a sloping  
shoulder—an ordinary "pop" bottle  
does very well—and do not add any  
more water to it than is necessary to  
properly dilute it, as a very large  
drench is difficult to administer. Next  
get the horse in a good position so that  
he has to take his medicine.

If the construction of the stable per-  
mits it, back him into a single stall,  
throw a rope over the beam at the  
back, make a noose on the end of it,  
pass it under the nose band of the  
halter and place it in the horse's mouth  
below the upper jaw. Now raise the  
horse's head until the medicine will run  
back in the mouth. Don't pull it too  
high or the horse will have difficulty in  
swallowing and there is danger of the  
medicine going the wrong way.

You can easily keep the head in this  
position by holding the rope in one  
hand while you pour in the drench with  
the other. Pulling out the tongue and  
squeezing and thumping on the throat  
are quite useless as inducements to the  
horse to swallow and may cause cough-  
ing. Should coughing occur, the head  
should be released at once even if the  
medicine is lost, as otherwise it might  
get into the lungs. This is a much bet-  
ter and more humane way than putting  
up the head with a twitch, and a  
drench is usually given without any  
difficulty.

### Millet as a Stock Food.

So far as nutritive properties are  
concerned the seed of millet is almost  
on a par with oats, says Michigan  
Farmer. The seeds, however, are not  
readily digestible, and it is therefore  
advised that they be reduced to the  
form of meal before feeding. In the  
form of hay it is relished by horses,  
cattle and sheep if it has been cut be-  
fore the stems have become coarse  
and reedy. In nutritive value it sur-  
passes timothy and nearly equals red-  
top and blue grass hay. Well authenti-  
cated experiments reveal the fact that  
millet as a steady diet is injurious to  
horses, affecting the kidneys and later  
the joints and bones. While so far as  
known no such trouble has been expe-  
rienced in feeding it to other animals,  
it will probably be safest to feed other  
roughage and grain with it.

### Rape For Sheep.

With rape for summer feeding and  
alfalfa for the winter, a flock may be  
fed at least possible expense, but with  
the greatest maximum of profit, says  
American Sheep Breeder. Alfalfa is  
the cheapest permanent crop known.  
Rape is the cheapest annual plant  
known, for it gives the largest quanti-  
ty of feed at the least cost and labor  
and, besides, leaves the land in the  
best possible condition. The mere pre-  
sence of rape on the land is worth, in  
addition to the value of the feeding  
for sheep, no small trifle in its in-  
creased productivity. Alfalfa has  
nearly one-half more protein, or matter  
containing nitrogen, than red clover  
and is therefore so much more valu-  
able for sheep.

### The Brood Mare.

Pregnant brood mares that are turn-  
ed into fields where feed is abundant  
early in the morning, when the grass is  
frozen or covered with frost, will be  
very liable to abort or suffer from colic.  
To insure safety keep them in their  
stalls until the sun has melted the  
frost.—Horse Breeder.

## THE SWINEHERD

The Poland-China is the best hog for  
general purposes, writes a Maryland  
farmer in American Agriculturist. It  
is a quick maturer, ready for the mar-  
ket at any age and can be made a  
heavyweight if necessary. I call it  
the poor man's hog. What I mean by  
that is just this: These hogs are ready  
to sell at any time when the farmer's  
pocketbook needs replenishing. A few  
pennies that feed makes the hog, but I  
say breed and feed must go together.  
A man can breed a ham on a hog, but  
he cannot feed one on. Look at the  
ham on a well bred Poland-China. It  
is well rounded, extending down to  
and sometimes covering the hock. Can  
one be fed on a common hog like that?  
The Poland-China is primarily a lard  
hog. Our butchers seem to like it  
very well, as the fat and lean are not  
mixed and can be easily separated.

### The Runt Pig.

The runt seldom if ever pays. The  
animal that pays is the one that gets  
a good start in the world and keeps it.  
It may pay to raise the runt if feed is  
no item. If feed is bought, the owner  
is better off if the runt is in the other  
man's pen.

### Selection of Swine.

No animal of any breed will uniform-  
ly beget young that are all of superior  
excellence. Prudent swinemens seem  
to realize this fact more than do any other  
kind of stock breeders and do not  
hesitate to use the knife accordingly.

### Value of the Boar.

In selecting a boar the price should  
not control the calculations if the pur-  
chaser has an idea of building up a val-  
uable herd. If a farmer has ten brood  
animals, improved stock from a first  
class sire will very soon pay in the ex-  
tra weight of pigs and pay the second  
time in the value of a well graded  
herd.

### Care of the Sow.

Feed brood sows moderately until  
after the pigs come and then increase  
the feed gradually until they are a  
week old, when the sows should be on  
full feed. It is important to give the  
sow some slop before she farrows to  
insure a good flow of milk.
