LAKE'S POSSIBILITIES

County, It's Future, Resources, etc.

In answer to the hundreds of letters received at this office from people all over the United States concerning Lake county, we have decided to give the following facts. They come as near answering the questions as any information we could give.

The principal towns of the county, we will briefly mention as being, Lakeview, the county seat, New Pine Creek, at the Oregon and California state line, Paisley in the Chewaucan valley on the Chewaucan river, Silver Lake, in the northern part of the county, Plush, in North Warner and Adel in South Warner. There are 5,130,240 acres of land, classifled as follows: Agricultural and alfalfa land, 1,129,647 acres; timber land, 1,124,353 acres and grazing land, 2.876.240 acres, - of this 700,000 acres is unsurveyed, 1,801,550 acres in reserves, 1,646,293 acres surveyed and open to entry and location, and 921,457 acres entered, showing it to be a small empire in area, of which there has been only a small fraction over 18 per cent of it taken up.

Its altitude varies from 3500 to 5600 feet. The valley lands of Lake County are unsurpassed in fertility and productivness, and grow large crops of wheat, oats, barley, rye, alfalfa and meadow grasses, while apples, peaches, pears, cherries, plums, apricots and the small fruits are produced in great abundance.

There is at the present time about 300,000 sheep, 77,000 cattle and 30,000 bead of horses and mules. Its income for live stock, for this year alone, has been more than \$300.00 per capita. Her merchants import goods annually from San Franscisco amounting to more than 5,000,000 pounds and her export of wool, alone is about 2,500,000 pounds.

TAXES :- For the purpose of assess ment, all property is listed and assessed by the assessor, at about one fourth of its cash value, and upon this assessed valuation, the tax rate for all purposes is sixteen mills.

The great interest shown by onr people in Public Schools, is manifest hills.

A Description of Lake in area, which is called the "Desert," year round. this is a misnomer, it is simply a

> level plain covered with sagebrush here. Five years since, the business and native grass, but not a river or portion of the town was in ashes; stream of any kind running through now the same district is all built in tion, and just now it seems to be the it, nevertheless, herders and va- brick stores, valued at from \$5000,00 queros will tell you that there are to \$30,000.00 per building. Our school all the alfalfa they can. Heretofore, more water holes to be found on it facilities we are proud of, especially all land that showed alkall on the than people realize, and that many in Lakeview, we have a graded surface, was shunned by the farmer of them have dug for and found school that employes six teachers, as plague spots-fit for nothing. water in many places from four to and has an attendance of 300 pupils But experience has proven that such six feet below the surface. As for dry, nine months in the year.

Yet we streets. Our altitude is 4825feet by that this alkaline condition enhances do not advise the homeseeker to go official survey. The average rain- the sacharine quality of the beet as Office at the Mercantile Company's tion would be too great. Nevertheless, we realize that the time is not fr. and the mean about 33. far distant when this same semi-arid locality will be made to blossom as the rose, for it affords the most magnificient fields on this side the moun-

tains for innumerable colonization schemes if properly equipped. There is yet some good vacant tim-

ber lands which is being rapidly taken up There is also, some less desirable scattering tracts that may not be taken up for years.

Our nearest shipping point is Madeline, the terminus of the Nevada-California-Oregon Railway, ninety five miles distant, consequently when our farmers or other producers have a surplus, the home demand is the only market, as it does not pay to haul ninety five miles by wagon trains at from % ct. to 1 ct. per pound, hence it is that our farmers do not attempt any great out-put, and the industry is neglected to that extent, that we sometimes pay exorbitant prices for many farm products, as instanced this spring when wheat sold readily for 2 cts. per pound, cracked barley 1% cts. per pound and potatoes 4 cts. per pound. Even now we are paying 2 cts. per pound for apples, and the past season we paid 6 cts. per pound for peaches, 3 cts. for cherries, 3 cts. for pears, 2 cts. for prunes, 2 cts. for plums, 20 cts. per gallon for currents, 60 cts. per gallon for strawberries, 50

valleys until the snow is off of the shops, two wagon shops, one barber in some few favored localities, where

Within the county is a plateau, one furniture store, and four general by being in sheltered nooks, there is roughly estimated as embracing two merchandise stores that carry from thousand five hundred square miles \$7000.00 to \$60,000.00 of a stock the

TIMBER LAND NOTICE

United States Land Office Lakeview, Oregon, Nov. 15, 1905. Notice is hereby given that in compliance with the provisions of the Act of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada and Washington Territory," as extended to all the Public Land States by act of August 4, 1892, Horace R. Dunlap, of Lakeview, county of Lake, state of Oregon, has this day filed in this office his sworn statement No. 2964, for the purchase of the SWM of sec. No. 17 in township No. 37 S., range No. 19 East, w.m., and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before Register and Receiver at Lakeview, Oregon, on Friday, the 26th day of January, 1906. He names as witnesses

w. R. Bernard, w. A. Massingill, Geo. Lynch, Wm. McCulley, all of Lakeview,

Any and all persons claiming adversely the above-described lands are requested to file their claims in this office on or before said 26th day of Jan. 1906. 47-4 J. N. Watson, Register.

The most unfavorable feature that presents itself to the eye of the stranger is the denuded appearance of the pasture lands, for nowhere on earth have we ever known of ranges so excessively and destructively pastured as these have been, that will rehabilitate themselves in their mantle of green so quickly as these do, if protected for one or two seasons, this alone is proof of an equable climate and productive soil. The fact is we hardly know the meaning of the word drough, or failure of crops, neither have we known any country where the "early to bed and late to rise" class of farmer has reaped so abundant a reward for his grudg-
