TROUBLESOME SOWS.
**How to Handle the Breechy and Vi-
 cious Animals.**
 When a sow becomes incorrigible
 usually the wisest course is to fatten
 and send her to market, writes R. L.
 Dean in National Stockman. The ten-
 dency is for the rest of the herd to con-
 tract the same habits. But it is often
 the case that the troublesome sow is
 the most prolific and the best mother
 of the bunch. Her unusual vitality
 exerts itself in mischief as well as in
 the rearing of offspring. The troubles-
 some sow usually lives better than the rest,
 for she has her share, and she gets as
 much more as she can. It is thought to
 be a waste of time to attempt to
 curb a vicious sow. However, there
 are occasions when we very much
 want to do so.
 The breechy sow at the first may be
 tamed by keeping her for a time in a
 strong inclosure until she loses her
 courage, so to speak. Every hog raiser
 should have a yard or building especial-
 ly adapted for this purpose and from
 which no animal can possibly escape.
 This habit if taken in time can be over-
 come in this way: If the habit is fixed
 draw her ears down close over her
 eyes and fasten together with wires.
 Use a piece of leather or rubber if the
 ears are erect and cannot be overlapped
 when drawn down over the eyes
 and attach the same with wire as be-
 fore. The purpose is to exclude as
 much light as possible. This device
 will be a hindrance to the chicken
 chaser. If you have a sow so vicious
 in forcing inclosures and eating chick-
 ens as to be past redemption in the
 ordinary sense try this: Fasten her
 ears over the eyes as described, then
 wire a light ring three inches in diam-
 eter firmly to her snout. This is a
 drastic measure and should not be
 used except in extreme cases. If prop-
 erly done she will not eat chickens or
 scale fences, and her meekness of de-
 meanor will be remarkable.

Truth About Normans.
 The use of the word Norman as ap-
 plied to the draft horse has been com-
 mon in the United States for over half
 a century. This is due largely to the
 fact that early importers gave that
 name to draft horses brought over
 from Normandy, France. However,
 there is no such breed in France, and
 the use of the word is incorrect. The
 Percheron is a distinct breed and is
 so regarded by the French government
 and is protected by the government
 and a stud book association. There are
 several other distinct draft breeds in
 France, as the Boulonnais, Breton, Pi-
 cardy and Polton, but there is no Nor-
 man breed. Most of the horses brought
 to America from France of the draft
 sort are Percherons, but they are very
 often carelessly referred to as Nor-
 mans or Percheron-Normans. Horses
 of the draft sort that are from France,
 but are not Percherons, may be regis-
 tered in the French draft stud book of
 this country, but not in the Percheron
 stud book.—Professor Plumb, Ohio Sta-
 tion.

FEEDING THE STOCK
 When you wean the colt give him
 plenty of oats, and he will go through
 all right, but no other grain will take
 the place of oats.
Fattening Hogs on Cottongseed Meal.
 In fattening hogs on cottongseed meal,
 says Farm and Ranch, don't add any
 wheat bran, but corn chops will be ab-
 solutely necessary. The wheat bran is
 too filling in its effect and not rich
 enough in nourishing material for fat-
 tening hogs. Use one part of cottong-
 seed meal to four parts of corn chops,
 well soured, and give as a thin slop.
Wheat Bran Good For Foals.
 Bran is very suitable as a supple-
 mentary concentrated food for weaned
 foals and young horses, says Farm
 Progress. There is nothing better than
 a little bran for mixing with the crush-
 ed oats when foals are being brought
 on to solid food, bran being easily di-
 gested by a foal when the latter is able
 to deal with solid food. In the case of
 sick horses and those that are conva-
 lescent the inclusion of some bran in
 their diet proves very beneficial. On
 account of its palatability bran tempts
 the appetite of sick horses more easily
 than other dry foods.

Ration For the Horse.
 From ten to twelve pounds of oats,
 divided into three feeds, should be sufficient
 concentrates for the carriage horse
 for one day's feeding, says Farm Jour-
 nal. From ten to twelve pounds of hay
 should be allowed in order to bring the
 total weight of the ration within the
 limit of twenty to twenty-two pounds.
 Bran mashes, fed once or twice a week,
 have a cooling effect upon the system.
 Part of the hay may be cut and moist-
 ened before feeding, the remainder being
 fed long, as the carriage horse has
 plenty of time for masticating his food.

Roughage For Horses.
 Fodder corn, thickly grown, so that
 only small nibbins form, and cured so
 there is no dust, is one of the best
 kinds of roughage for horse feeding.
 For stallions, idle horses, brood mares
 and growing colts corn forage of good
 quality, cured right, is one of the very
 best and most economical substitutes
 for timothy hay.—Farm Journal.
Feed For Fattening Lambs.
 Dry corn gives better results than
 soaked corn for sheep, owing to the
 better secretion of saliva in eating the
 dry grain. Oats prove a satisfactory
 ration when given to fattening lambs,
 but it requires about 25 per cent more
 oats than corn for a given gain. It
 requires about twice as much corn as
 bran for lambs. Roots should be fed
 in combination with grain. A ration
 of equal parts corn and oats or two
 parts oats to one of corn, fed with
 roots, is an economical ration for fat-
 tening lambs.

**Are You Tired, Nervous
 and Sleepless?**

Nervousness and sleeplessness are nat-
 urally due to the fact that the nerves are
 not fed on properly nourishing blood;
 they are starved nerves. Dr. Pierce's
 Golden Medical Discovery makes pure,
 rich blood, and thereby the nerves are
 properly nourished and all the organs of
 the body are run as smoothly as machin-
 ery which runs in oil. In this way you
 feel clean, strong and strenuous—you are
 toned up and invigorated, and you are
 good for a whole lot of physical or mental
 work. Best of all, the strength and in-
 crease in vitality and health are lasting.
 The trouble with most tonics and medi-
 cines which have a large, booming sale
 for a short time, is that they are largely
 composed of alcohol holding the drugs in
 solution. This alcohol shrinks up the red
 blood corpuscles, and in the long run
 greatly injures the system. One may feel
 exhilarated and better for the time being,
 yet in the end weakened and with vitality
 decreased. Dr. Pierce's Golden Medical
 Discovery contains no alcohol. Every
 bottle of it bears upon its wrapper *The
 Badge of Honesty*, in a full list of all its
 several ingredients. "For the druggist to
 offer you something he claims is 'just as
 good' is to insult your intelligence."
 Every ingredient entering into the
 world-famed "Golden Medical Discovery"
 has the unanimous approval and endorse-
 ment of the leading medical authorities of
 all the several schools of practice. No
 other medicine sold through druggists for
 like purposes has any such endorsement.
 The "Golden Medical Discovery" not
 only produces all the good effects to be
 obtained from the use of Golden Seal
 root, in all stomach, liver and bowel
 troubles, as in dyspepsia, biliousness, con-
 stipation, ulceration of stomach and
 bowels and kindred ailments, but the
 Golden Seal root used in its compound-
 ing is greatly enhanced in its curative ac-
 tion by other ingredients such as Stone
 root, Black Cherrybark, Bloodroot, Man-
 drake root and chemically pure triple-
 refined glycerine.
