Range-leasing Policy.
 Western states will be compelled to
 face a range-leasing policy in due
 course of time, if the present trend
 of events in regard to public domain
 continues. No such law will get
 through the present congress, as the
 leaders of the two houses are not
 ready to precipitate discussion, but
 it is apparent to observing men that
 the time is not distant when such
 will be the case, and leading stock-
 men are already preparing for the
 issue. Those given to careful research
 are endeavoring to get facts for
 presentation. Texas, in her career
 of liberal and independent treatment
 of public lands is a shining example
 for the range leaser. Wyoming's
 experiences are also being exploited.
 The customs of the entire country
 based upon the principle of getting
 public land into the private owner-
 ship of the individual, are being offered
 on the side of those opposed to the
 leasing system.

Since the Public Land Commission
 reported in favor of leasing that
 part of the public domain adapted
 to range purposes, the policy is re-
 garded as having Administration
 backing. President Roosevelt's re-
 ference to the subject in his message
 was the last endorsement, which was
 expected to force the question this
 Congress. As the first session draws
 toward its close, there seems no room
 for range-leasing before the summer
 adjournment. The next session will
 be short, and unless the administra-
 tion presses urgently for considera-
 tion of this measure, or pro-leasing
 interests perform the same service, it
 is hardly probable that the short
 term will create the law that is bound
 to have broad influence upon the en-
 tire West.

In whatever is done, there are sure
 to be provisions that will facilitate
 the homesteader. Some advocates
 of leasing believe that the home-
 stead entryman should have the
 right to enter upon land during the
 term of even an annual lease, after
 proving his bona fide home purpose.
 Others are inclined to think that
 settlement of the country will be am-
 ply safeguarded by providing that
 the homestead entryman shall be
 given access to the land only after
 expiration of a range lease. Cham-
 pions of the small stockman will
 also insist that an entryman taking
 range land, shall be insured a good
 range acreage about his homestead,
 which others cannot lease. The
 range homestead has been suggested

as a law that would encourage the
 cattle industry at least, if not the
 sheep, and recognize the semi-arid
 condition of the country. This sug-
 gestion is to let a man take a large
 range acreage as a single homestead,
 the limit being such probable yield
 of forage as the average agricultural
 homestead yields.
 All of the solutions proposed could
 not be enumerated in a limited space,
 but enough have been advanced to
 prove that when the question must
 finally be decided, there will be a
 wide diversity of courses offered.
 Western states should begin a care-
 ful study of the situation. They will
 be most vitally affected, and unless
 their rights as states and industrial
 commonwealths are ably championed
 in the formative hour of law making,
 theories that are utterly impracti-
 cable may be forced upon them.
 There has been such a stir through-
 out the east in regard to the public
 domain, that radical action might
 be expected if the true status of the
 West is not made the subject of con-
 stant education. Many Eastern peo-
 ple regard the acquisition of more
 than 160 acres of public land by one
 person or company as "land grab-
 bing." They do not realize the nec-
 essities of a range country. When
 informed of the timber acreage re-
 quired by a large lumber concern
 before erecting a mill, they are in-
 clined to style the business precau-
 tion a public outrage. To meet
 such views as these, and have what-
 ever legislation is enacted kept upon
 a plane permitting the most rapid
 and permanent Western develop-
 ment, many Western people are al-
 ready anticipating the discussion by
 gathering data.

Fortunate Missourians.

 property and move to Arizona, but
 after using New Discovery a short
 time he found it unnecessary to do so.

Suprstitutions of Gems.
 A jeweler who has made a study of
 the superstition of gems has discovered
 that the power of the talisman is be-
 lieved to be greatly enhanced by hav-
 ing an appropriate emblem engraved
 on the particular stone chosen.
 Thus the bloodstone—sacred to
 people born in the month of March—
 should be engraved with a snake's
 head, as its function is to preserve
 from snakebites. The garnet (April)
 is a protection against fire, especially
 if engraved with a lion.
 Other stones, with their appropriate
 devices, are as follows:
 Sapphire (January), a ram; ameth-
 yst (February), a bear; emerald (May)
 a sparrow; agate (June), a dagger;
 carnelian (July), a man with a scap-
 ter; sardonyx (August), an eagle;
 chrysolite (September), an ass; elec-
 trine (October), a human hand; topaz
 (November), a falcon; coral (Decem-
 ber), a man bearing a sword.
 It may be remarked that this list
 differs from the ordinary list of stones
 appropriate to each month of the
 year. This, however, the authority
 explained, is because each month has
 more than one stone peculiar to it,
 and those selected above are the
 most suitable for engraving.

Is Disease a Crime?
 Not very long ago, a popular magazine
 published an editorial article in which
 the writer asserted, in substance, that all
 disease should be regarded as criminal.
 Certain it is, that much of the sickness
 and suffering of mankind is due to the
 violation of certain of Nature's laws.
 But to say that all sickness should be
 regarded as criminal, must appeal to
 every reasonable individual as radically
 wrong.
 It would be harsh, unsympathetic,
 cruel, yes criminal, to condemn the poor,
 weak, over-worked housewife who sinks
 under the heavy load of household cares
 and burdens, and suffers from weak-
 nesses, various displacements of pelvic
 organs and other derangements peculiar
 to her sex.
 Frequent bearing of children, with its ex-
 acting demands upon the system, coupled
 with the care, worry and labor of rearing a
 large family, is often the cause of weak-
 nesses, derangements and debility which are
 aggravated by the many household cares,
 and the hard, and never-ending work which
 the mother is called upon to perform. Dr.
 Pierce, the maker of that world-famed rem-
 edy for woman's peculiar weaknesses and
 ill—Dr. Pierce's Favorite Prescription—says
 that one of the greatest obstacles to the cure
 of this class of maladies is the fact that the
 patient demands upon the system, coupled

 Pierce, the maker of that world-famed rem-
 edy for woman's peculiar weaknesses and
 ill—Dr. Pierce's Favorite Prescription—says
 that one of the greatest obstacles to the cure
 of this class of maladies is the fact that the
 patient demands upon the system, coupled
 with the care, worry and labor of rearing a
 large family, is often the cause of weak-
 nesses, derangements and debility which are
 aggravated by the many household cares,
 and the hard, and never-ending work which
 the mother is called upon to perform. Dr.
