On Matters That Interest You
Your local paper is a necessity
to you, financially and socially.
But a NEWSPAPER OF GEN-
ERAL CIRCULATION, contain-
ing the latest news of the world,
is equally necessary to you. The
"up to date man" will provide
himself with these two essential
features of progress.
In THE TWICE-A-WEEK
SPOKESMAN-REVIEW, Spoka-
ne, Wash., will be found the
very latest news of the world, its
matter including information on
politics, commerce, agriculture,
mining, literature, as well as the
local happenings in the states of
Montana, Oregon, Idaho, Wash-
ington and the province of British
Columbia. In addition, its col-
umns for women, its popular
science articles, its short and con-
tinued stories, its "Answers to
Correspondents" and "Puzzle
Problems" combine to form a
home newspaper that at \$1.00 per
year can nowhere be excelled.
ITS ADVERTISING VALUE.
Perhaps you have something to sell—a
farm, a team, farm machinery. You may
wish to buy something. The best possible
way to communicate with people who wish
to buy or sell is by inserting a small ad-
vertisement in THE SPOKESMAN-REVIEW.
Farmers, stockmen, lumbermen and min-
ers take THE TWICE-A-WEEK.
If you wish to reach business men and
newcomers, use the DAILY or SUNDAY
SPOKESMAN-REVIEW.

SUBMARINE REEFS.
How They Are Located by the Naval
Engineers.
Prior to the nineteenth century navi-
gation, except on the high seas, was
mainly that of the Irish pilot who
claimed to know all the rocks in the
harbor. "An' there's wa'n of them!"
said he as he struck.
On approaching land one needs to
know how far he is from the lighthouse
or headland in sight. Triangulation
tells him. Two points on land being
taken for the base of the triangle, lines
from these points, representing the
other two sides of the triangle, are
drawn until they intersect. That apex
of the triangle will be the point where
the observer is. Then the distance
from his point to the land can be easily
calculated.
The maritime wars under Napoleon
disclosed the dangerous ignorance of
French mariners about their own sea-
coast. French vessels were unable to
break or run their enemies' blockade.
After peace was established Beau-
temps-Beaupre was appointed as the
organizer and chief of corps of engi-
neers to chart the whole coast of
France. His work was so well done
that the other naval powers hastened
to chart their own coasts according to
his methods.
The head of a rock may easily escape
ordinary soundings, or lie between
soundings. When covered by ten or
more feet of water and unmarked by
ripples or breakers, it is hard to find.
Even when known it is hard to get
soundings. The lead may glide over
it, so that even in well surveyed waters
some unlucky ship out of hundreds
passing there may "find the rock with
his keel."
Groups of buoys with grappling irons
are lashed together in long sweeping
lines and sunk behind the small sound-
ing boat until they touch bottom, and
are then towed until they strike a
rock. In calm weather rocks and reefs
may be seen at great depths from great
heights in balloons. Even after a rock
has been discovered, its depth and po-
sition must be precisely ascertained.
Fishermen, too, help make known
these uncharted rocks, rewards being
offered for all new ones discovered.
England, the United States, Spain,
Italy and other maritime nations have
adopted French methods. Japan for
years has devoted to the subject its
usual minute, trustworthy and master-
ful study, but has limited the English
crowded and complicated charts rather
than the artistic execution of the
French.—New York Tribune.

Toilet-Toilet.
In the "New World of Words," 1729,
"toilet" is defined as "a kind of Table-
cloth or carpet made of the Linnun,
Satin, Velvet or Tissue, spread upon a
Table in a Bed Chamber where Per-
sons of Quality dress themselves: a
Dressing-cloth." A similar definition
is given in Bailey's dictionary. The
origin of the word is curious, for Cot-
grave has: "See Toilette." A toilet,
the stuff which drapers lay about their
clothes; also a bag to put nightgowns
in." In the "Rape of the Lock," 1,
121, "toilet" seems used for the table
and its contents.
And now, unweild, the toilet stands dir-
play'd.
Each silver vase in mystic order laid.
—Notes and Queries.

Giant Tomato Plants.
The largest tomato plants in the
world are found in California. One
grower has three plants which have
reached a length of thirty feet. In
three months from the time the seeds
were planted the vines had climbed to
the top of a twenty foot trellis. The
trunks of these plants, says What to
Eat, are one and a half inches in di-
ameter and the foliage is thick and
luxuriant. Enormous quantities of to-
matoes have been picked from them
and the fruit is of unusual size, pos-
sessing an extraordinary fine flavor.

Lava.
Lava may be blown into opaque bot-
tles of gossamer lightness, and the
harder sort makes a beautiful green
glass of half the weight and double the
strength of ordinary glass. But it is
not always the same. Every volcano
pours out its own special brand of
molten mixture, disagreeable to walk
on, but sometimes yielding precious
products, as pumice stone. Lava, like
all things, decomposes under the touch
of time, as the fertile plains of Sicily
testify.

Marriage.
"What I want," said the young man,
"is to get married and have a peace-
ful quiet home."
"Well," said Farmer Cornbloss,
"sometimes it works that way, and
then again sometimes it's like Joinin'
a debatin' society."—Washington Star.

Curiosity Aroused.
"Papa, what makes the cheese smell
so?"
"The process by which it was cured,
I presume."
After some moments of profound
cogitation, "Papa, what would it smell
like if it hadn't been cured?"

A Chance For Somebody.
"Very strange, isn't it, about the
story of Adam and Eve?"
"How?"
"Why, as far as I know, it hasn't
been worked up into a historical novel."
—Watson's Magazine.

Injuries of Life.
The injuries of life if rightly improv-
ed will be to us as the strokes of the
statuary on his marble, forming us to
a more beautiful shape and making us
fitter to adorn the heavenly temple.—
Cotton Mather.

The wise prove and the foolish confess
by their conduct that a life of em-
ployment is the only life worth lead-
ing.—Paley.

Nature's Way Is Best.
The function strengthening and tissue
building plan of treating chronic, linger-
ing and obstinate cases of disease as pur-
sued by Dr. Pierce, is following after
Nature's plan of restoring health.
The new natural remedies, that is
extracts from native medicinal plants,
prepared by processes wrought out by
the expenditure of much time and
money, without the use of alcohol, and
by skillful combination in just the right
proportions.
Such are ingredients of Dr. Pierce's
Golden Medical Discovery, Black Cherry-
bark, Queen's root, Golden Seal root,
Bloodroot and Stone root, specially exert
their influence in cases of lung, bronchial
and throat troubles, and this "Discovery"
is, therefore, a sovereign remedy for
bronchitis, laryngitis, chronic coughs,
catarrh and kindred ailments.
The above native roots also have the
strongest possible endorsement from the
leading medical writers, of all the several
schools of practice, for the cure not only
of the diseases named above but also for
indigestion, torpor of liver, or bilious-
ness, obstinate constipation, kidney and
bladder troubles and catarrh, no matter
where located.
You don't have to take Dr. Pierce's
saying alone as to this; what he claims
for his "Discovery" is backed up by the
writings of the most eminent men in the
medical profession. A request by postal
card or letter, addressed to Dr. R. V.
Pierce, Buffalo, N. Y., for a little book
of extracts from eminent medical au-
thorities endorsing the ingredients of his
medicines, will bring a little book free
that is worthy of your attention if
needing a good, safe, reliable remedy of
known composition for the cure of almost
any old chronic, or lingering malady.
Dr. Pierce's Pleasant Pellets cure con-
stipation. One little Pellet is a gentle
laxative, and two a mild cathartic.
