COUNTESS OF WARWICK.

A STRIKING BEAUTY OF ENGLISH COURT WHO IS FRIEND OF WORKINGMEN.

Has Accomplished Great Philanthropy, Foundling Girls' Schools in Dairying, Poultry, Etc.-Prominent

England has at least one titled woman whose wealth and position have not proved sufficient to blind ber to conditions which surround less fortunate men and women. She is the Countess of Warwick, long the reigning beauty of King Euward's court, and one of the most famous women in two continents.

The Countess has recently come into prominence through her par . ipa-tion in the English elections and is a strong advocate and supporter of Will Thorne, candidate of the dock laborers for a seat in the House of Commons. The Countess strongly supports the contention of the laboring element for a labor party in parliament and gowned in the most bewitching of Parisian frocks and in a red automobile she has been stirring things up pretty lively in the forty-five parliamentary districts in which repre-sentatives of organized labor were running for the House of Commons, SENT DELEGATION TO AMERICA.

This very democratic Countess recently sent a delegation of twenty-five women to the United States to study labor conditions here. Each "Is intrusted with a different mission. One visited stenographers and typewriters, another went to tailor shops and still another to the factories where young men and women are employed and the entire labor field was adequately cov-ered. The Countess defrayed all expenses of the trip and is now using the material which her delegation brought back to her for speeches to the laboring classes.

Not long ago the Countess addressed a tremendous crowd of workmen. Her stage was a tradesman's wagon and handreds of workmen went without their dinners in order to hear her She was given a great ovation, called the men "comrades and

THE COUNTESS OF WARWICK.

friends" and urged them to strain every effort to get a labor party in parliament. "You workers are the empire," de-

clared the Countess and this with a succession of spirited assertions she made were lustily cheered by the laboring men.

The Countess of Warwick is one of England's most famous women. Before the succession of her husband to the earldom she was Lady Brooke and gained the nickname of "Babbling Brooke" for having told some t' ngs in connection with the famous baccarat party at Tranby Croft which proved one of the most sensational news stories of the year. The Prince of Wales, now King Edward VII, was a member of the party and a subsequent witness in the case

TO TEACH DAIRYING AND CHICKEN GROWTH.

In the past few years the Countess of Warwick has devoted nearly her entire time to phianthropic and charity work. She once managed a linen and lace store but the venture proved Later she founded a unsuccessful. school and dairy work and poultrykeeping for young girls, a home for crippled children and a tecanical school.

CANDIED FLOWERS.

England Has Begun Strange Demands for Sugared Blossoms From the United States.

One of the latest developments of luxury is said to be the candying of fragrant flowers. The notion is not altogether new, for violets have long been made into confections for the palate, as well as into boquets for the

olfactory organs. At any rate, it seems that the fashion has acquired a new impetus of
late, and a candied violet is coming
to be regarded as an acceptable "bonne" as circumstances or conditions dictate. Expert held up before the House a Chicago and London.

Chicagoan—Well, I can't blame you
altogether, old man. I honestly think
myself that it's the finest between

bouche" to be presented to a lady. There is also, it is said, a demand for sugared rose petals, which is being catered to by some enterprising artists in sugar. It can hardly be pretended that flowers made into "sweets" are of any medicinal efficacy, though darpask leaves have long held a recognized place in the materia medica.

Whether the violet has any therapeutic qualities does not appear, though the leaves (not the flower) have just now some reputation-outside the medical faculty-as a cure for cancer. The best that can be hoped for, if flowers are to be eaten as well as to be seen and smelled, is that they may in all cases prove to be innocuous. It is a nice question whether the perfume is always a safe

Perhaps the modern craze is, after all, only a form of luxury. A candied violet or a dish of rose leaves cunningly prepared for the tea table could not possibly enter into the category of cheap sweets for the millions, and it is understood that the sugar trust is not interested.

BREAKS BY CONGRESS

Peculiar Mistakes Due to Tremen-dous Amount of Work Transacted Just Before Adjournment.

the hurry and bustle of "get away" day in Congress, a few errors slipped in to upset the calculations of party leaders. One of these was the signing of the agricultural appropriation bill by the President before that measure contained the signature of the Speaker of the House of Representa-tives. Of course this oversight was corrected, but the question then arose as to the importance of having the bill signed by the Speaker and the Mce-President. Their signatures merely certify that the bill has passed their respective houses, the important fact being that they have been passed by the House and Senate. For this reason it is not regarded as being absolutely indispensable that a bill should be signed by the presiding officer of the House. All that is necessary is to frauded. The space in front of the establish the fact that it has been so

Another "break" was the presidential approval of the sundry civil bill jellies, tins of peas, tomatoes, corn, containing an item appropriating prepared spices, bottles of whiskey and \$3,000,000 for a site for a new departmental building in Washington. This item had been dropped out of the ables scattered over two tables, bill in conference but the enrollment Representative Mann proceeded to clerks failed to notice the omission demonstrate to the House through and so included this item in the copy of the bill laid before the President for sity for a national pure food law. his signature. When the error was discovered, a resolution was adopted the Congressman was the ordinary by both houses of Congress repealing condiment—pepper—which to the lay the feature of the bill making the mind is considered too cheap for any \$3,000,000 appropriation.

takes occur, as all of the employes of merous concerns offering for sale a both the Senate and House during the certain grade of adulterant which last few days of Congress have an could be used to produce pepper or enormous amount of work shoved upon almost any other of the spices with them, so that when Congress actually take to their beds for several days in the members in the vicinity started order to recuperate.

CANADIAN RECIPROCITY.

Northern Sister Would Like Such Arrangement; But is Waiting Move by This Country.

letter from Ottawa, Canada, states that the question of reciprocrity between Canada and the Unite. States is by no means deau, as was clearly shown by the recent decate on the Canadian budget in a number of speeches, which, while they admitted that the United States did not appear to care for reciprocity, it would if it could be brought about on mutually advantageous terms, se a good thing for both sides of the line. Many of the crown ministers and even Sir Wilfrid Laurier himself, the premier, and described in England as the foremost statesman in the British Empire, are favorable to Canadian-American rediprocity, if it can be had. Richard Cartwright, minister of trade and commerce, said recen. y that there could be no better British policy than to do everything possible to encourage good relations with the United States. Senator Lougheed, the concervative

leader in the Senate, stated that he thought no higher work could be found by King Edward than to promote the good relations of the two peoples, and o bind more closely together the two Angle-Saxon nations. He knew no happier way of strengt ening the bond between the Anglo-Saxon peoples on the North American Continent than for the King and Queen to visit the shores of North America at the pres-

ent time. If reciprocity is not visibly to the front to-day it is because public opinion in Canada reg rds reciprocity as unattainable and the position of the anti-reciprocity men who are for the moment supreme, as unassallable. Hence, and for no other reacon, reciprocity sentiment is put on the shelf until called for again, and an ostentatious appearance of indifference is manifested in Canada which will be stiffly maintained as long as the United States government makes no forward movement that public opinion in the Dominion can accept as sincere and based on a spirit of reasonableness

and fair play,

To those who are able to read between the lines, the announcement of he finance minister that the changes to be made in the Canadian tariff, when revision takes p.ace next session, must depend upon such new conditions as may have occurred, is obviously meant for the people at Washington who stand in the way of reciprocity, and those in London who have blocked

A GROCERY IN CONGRESS.

REPRESENTATIVE MANN PLAYS SALESMAN AND DRUGGIST TO UNMASK FRAUDS.

Short Weight and Fraudulent Foods the Lure of Many Department Stores and Mail Order Houses. Honest Dealers Handicapped by Deceptions.

When the pure food bill was before the House of Representatives a few weeks ago, intense laterest was displayed by the members of that body a "grocery store" established by Representative Mann of Illinois. Mr. Mann had been given a special privilege by the House committee having the bill in charge to demonstrate the manner in which the ordinary food

REPRESENTATIVE MANN.

products of the country are adulterated, and how the consumer is despeaker's desk resembled a small section of a delicatessen store and a corner grocery with cereals, jams, wine, imported sausages, brandled cherries and other edibles and drinkthese various food products the neces-

One of the first articles taken up by manufacturer to spend time in adul-It is not strange that these mis- terating. He read circulars from nusome slight modification. As he scatadjourns many of them are ready to tered a package of this over his desk back in order to avoid the usual sneezing which follows the inhalation of a small quantity of pepper. But they were reassured by the "groceryman" that it was not harmful, for while it was called pepper it was nothing but ground olive pits. He convulsed the House when he read the price list of adulterants showing that they were offered to the trade for \$20 a ton in five-ton lots, and that at that rate they were guaranteed to make the finest pepper which, as everyone knows, is sold by the ounce. He made the statement that even the pepper berry itself was adulterated by a cleverly contrived manufacture of tapioco colored with lamp black.

Possibly the most striking demonstration of the afternoon was one with a bottle of red cherries. These cherries, it was explained, were picked green, and that after being bleached out white by the use of a powerful acid, had been colored the brilliant by the use of coal tar dye-s deadly poison if used in large quanti-Representative Mann dipped a piece of white cloth in the "juice" of these cherries, and it partook of a brifliant red as though it had just come

from a dyers. Olive oil, explained Mr. Mann, is product which is in most cases, adul terated. In many instances the counterfeit is merely American cotton seed oil—a wholesome and satisfactory dressing for salad, but it costs about ¼ as much as real olive oil, and the American buyer certainly does not care to purchase a dressing for four times its actual worth.

HIVELESS HONEY.

One of the freak exibits was bottle of "honey" which, in order to complete the assurance of the buyer that the article was genuine, contained. bee, yet the whole mess was pure and simple glucose, and had never been near a hive, much less a comb. The hive probably was a ten story factory in one of the large cities.

A bottle of "Freezine" was exhibited

by Mr. Mann, who explained that this rather plain. remarkable article was guaranteed to preserve meat from the action of the air and stop decay. While he admitted that it would stop the action of nature on meats, he claimed that the preservative itself was actually poisonous, containing sulphide of soda with red coal tar dye and could not be

used safely upon human food. The public is unwittingly defrauded to a great extent through short weight and short measure in package goods explained Mr. Mann, and he insisted that the manufacturers should be compelled to state on the label the quan-

ottle supposed to contain a quart of large and the contain a quart of large and a downess, with host brows and eyes and some and unmerous other articles of food are apparently put up in pound packages and so the buyer considers, but in fact say of those on the market really contained as the large and the large of large feels branches.

figures that while we used last year more that a billion pounds of coffee, and while about 250,000,000 pounds were supposed to be Mocha and Java, there were actually imported into this count. ast year only a fraction over 2.00,000 pounds of Mocha and 10,000 pounds of Java, or approximately less than 13,000,000 pounds, or only 5 per cent. of the people who think they drink Mocha and Java every day have been deady and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that is goodly and fair," quoth Sir Nigel, "but you have also been spared much that a gain, marched on with the langhing Company.

"That was eve as if by accident, the body of a real 000 pounds of Java, or approximately and Java every day have been deceived, and yet the facts seem to be

Figures like these, however, although ordinarily impressive and convincing, did not attract so much attention in the House, because members were so absorbed in the practical demonstration of the extent to which fraudulent manufacturers food products have been willing go in the way of swindling the public.

Praise.

New Yorker-To tell the truth, we are proud of this hotel.

reduced the noble gift which the knigat had so freely bestowed to a single penny, which the beggar, with many mumbled blessings, thrust away into his wallet. Then, spurring his steed, the young squire rode at the top of his speed after his companions, and overtook them just at the spot where the trees fringe off into the moor and the straggling hamlet of Hordle lies scattered on either side of the winding and deeply rutted track. The Hordle lies scattered on either side of the winding and deeply rutted track. The Company was already well-nigh through the village; but as the knight and his squires closed up upon them, they heard the clamor of a strident voice, followed by a roar of deep-chested laughter from the ranks of the archers. Another minute brought them up with the rear-guard, where every man marched with his beard on his shoulder and a face which was agrin with merriment. By the side of the column walked a huge red-headed bowman, with his hands thrown out in argument and expostulation, while close at his heels followed a little wrinkled woman, who poured forth a shrill volley

he must be a monk forsooth, and all because a wench was wise enough to turn
her back on him. Then he joins a rascally crew and must needs trapse off to
the wars, and me with no one to bait
the fires if I be out, or tend the cow if
I be home. Yet I have been a good
mother to him. Three hazel switches a
day have I broke across his shoulders,
and he takes no more notice than you
have seen him to-day."

"Doubt not that he will come back to
you both safe and presserous my fair

you both safe and prosperous, my fair dame," quoth Sir Nigel. "Meanwhile it grieves me that, as I have already given my purse to a beggar up the road. I—"
