## PLANTING OF TREES

**HOW TO GET BEST RESULTS UNDER  
 ALL CONDITIONS.**

**Each Street Should Be Planted With  
 the Same Variety.** Says J. Horace  
 McFarland — Points on Selecting  
 Trees and Protecting Them.

In response to a letter of inquiry ad-  
 dressed to the American Civic associa-  
 tion the following valuable informa-  
 tion has been furnished by its presi-  
 dent, J. Horace McFarland:

If you are to plant street trees in  
 your town it should be done with intel-  
 ligent and careful consideration and  
 not at random. You can find out what  
 trees do best in your neighborhood by  
 investigation. It is always preferable,  
 and very greatly preferable, to use  
 trees that are either indigenous or  
 have been sufficiently tested to make  
 sure that they will be successful. There  
 is nothing to be gained and much to  
 be lost by the introduction of nursery-  
 men's novelties, of trees from other  
 localities that are not sufficiently test-  
 ed or of those that are not long lived  
 and of proper habit for street planting.

The next matter of importance is to  
 see that, if you are to plant whole  
 streets at a time, they are planted all  
 in the same kind of tree and not bit or  
 miss. Our great national capital,  
 Washington, is a conspicuous example  
 of how well tree planting can be man-  
 aged, for there are great avenues with  
 pin oaks and others with sycamores  
 and others with tulips and others with  
 elms, but on no street has there been  
 permitted a heterogeneous mixture.  
 Mixing of trees can be likened to the  
 condition that would prevail if a gen-  
 tleman getting for himself a double  
 breasted frock coat would alternate the  
 buttons in all different sorts of texture.

It is next important to see that the  
 trees are not planted too closely. Long  
 lived trees need room to develop. The  
 small trees you will undoubtedly use  
 look very lonesome when planted at the  
 proper distance apart, but they will  
 grow all the better for having room to  
 grow. I have seen examples of tree  
 planting not over ten or twelve feet  
 apart, with the certainty that after  
 awhile the trees would be damaging  
 each other and some would have to  
 be removed. Never less than twenty  
 feet and preferably more space should  
 be permitted between trees.

You can assure your property owners  
 that the modern idea is that the city  
 had better own the trees. As your  
 town grows it will be able to provide  
 care for these trees. The best possible  
 work now under way is in New Jersey,  
 where there are tree planting commis-  
 sions. In this state if the town elects  
 trees are planted under the local com-  
 missioners purely at the determination  
 of the commission as to variety and  
 character, distance, etc., but at the cost  
 of the abutting property owners.

In respect to varieties of trees let me  
 suggest a consideration of the Ameri-  
 can elm, the pin oak, the red oak, the  
 American sycamore, the English sycam-  
 ore, the tulip tree, the hard or sugar  
 maple, the red maple, possibly the Nor-  
 way maple and the sycamore maple.  
 Certainly omit the silver maple or the  
 ash leaved maple from your considera-  
 tion. The white ash may be used and  
 is long lived. You may have other in-  
 digenous trees which approach the  
 ideal form for street trees, which is  
 that of the American elm. If you can  
 by any means plant the largest propor-  
 tion of elms, do so. I have visited the  
 city of Oswego, N. Y., where forty or  
 fifty years ago a general tree planting  
 movement was undertaken and all the  
 streets were planted wisely with elms.  
 The effect is now of the utmost beauty.

You need to have ordinances to take  
 the control of these trees out of the  
 hands of the property owner and to  
 place it in the hands of an unpaid city  
 commission which would include some  
 with expert knowledge. Surely you  
 can find some public spirited men and  
 women to serve in this capacity. As  
 to protecting the trees from boys, the  
 best possible way is to teach the boys  
 to love the trees by showing them pic-  
 tures of good trees in your schools and  
 giving them information about trees.

As to the trimming proposition, it  
 must be absolutely restricted if you  
 are to have good trees. If the trees  
 come to you in fair order with a good  
 root system they will need the cutting  
 off of all mutilated roots and a reason-  
 able shortening in of the upper  
 branches to a systematic shape, cut-  
 ting in each case close to a bud smooth-  
 ly. If they are then planted in large  
 holes carefully dug and each tree sur-  
 rounded by some good soil without any  
 fresh manure they should live and  
 grow and require no other trimming  
 for many years save such as is includ-  
 ed in rubbing off as soon as they ap-  
 pear buds and shoots on the lower part  
 of the stem. Annual trimming simply  
 for the sake of trimming is absolutely  
 vicious and must be prohibited. There  
 is no more necessity for trimming a  
 tree once a year than there is for trim-  
 ming a person's ears once a year.

Trees while young must be staked  
 if they are to do well. There are mod-  
 ern tree guards of wire which are  
 good, but they are expensive. If you  
 will plant with the tree a good solid,  
 hard wood stick, say 2 by 4, driving it  
 firmly into the ground after the hole is  
 dug, so that it is substantially planted,  
 and will fasten the tree to this by a  
 band of leather or old hose or strong  
 soft cloth, which is crossed between  
 the tree and the stake, tacked on the  
 back of the stake, the trees will be  
 well protected while they are refasten-  
 ing themselves with a new root stem.  
 Please note that the fastening of the  
 tree to the stake is of the utmost im-  
 portance, as if it is tightly bound to  
 the stake it will chafe and hurt itself,  
 but if it is held by the strap above de-  
 scribed, which is looped around the  
 tree and then crossed before the strap  
 passes around the post, it will be in a  
 sling and cannot damage itself.

**Dr. Pierce's Favorite Prescription,**  
 is not a secret or patent medicine, against  
 which the most intelligent people are  
 quite naturally averse because of the un-  
 certainty as to their harmless character,  
 but is a medicine of known composition,  
 a full list of all its ingredients being  
 printed, in plain English, on every bottle  
 wrapper. An examination of this list of  
 ingredients will disclose the fact that it  
 is non-alcoholic in its composition, chemi-  
 cally pure glycerine taking the place of  
 the commonly used alcohol. In its make-  
 up, the "Favorite Prescription" of Dr.  
 Pierce is in fact the only medicine put up  
 for the cure of woman's peculiar weak-  
 nesses and ailments, sold through drug-  
 gists, that does not contain alcohol and  
 that too in large quantities. Furthermore,  
 it is the only medicine for woman's special  
 diseases, the ingredients of which have  
 the unanimous endorsement of all the  
 leading medical writers and teachers of  
 all the several schools of practice, and  
 that too as remedies for the ailments for  
 which "Favorite Prescription" is recom-  
 mended.

A little book of some of these endorse-  
 ments will be sent to any address, post-  
 paid, and absolutely free if you request  
 same by postal card or letter, of Dr. E.  
 V. Pierce, Buffalo, N. Y.

Don't forget that Dr. Pierce's Favorite  
 Prescription, for woman's weaknesses and  
 delicate ailments, is not a patent or secret  
 medicine, being the "Favorite Prescrip-  
 tion" of a regularly educated and gradu-  
 ated physician, engaged in the practice  
 of his chosen specialty—that of diseases  
 of women—that its ingredients are printed  
 in plain English on every bottle wrapper;  
 that it is the only medicine especially de-  
 signed for the cure of woman's diseases  
 that contains no alcohol, and the only  
 one that has a professional endorsement  
 worth more than all the so-called "testi-  
 monials" ever published for other medi-  
 cines. Send for these endorsements as  
 above. They are free for the asking.

If you suffer from periodical, headache,  
 backache, dizziness, pain or dragging  
 down sensation low down in the abdomen,  
 weak back, have disagreeable and weak-  
 ing, catarrhal, pelvic drain, or are in  
 distress from being long on your feet, then  
 you may be sure of benefit from taking
