The Illinois Central maintains unexcelled service from the West to the East and South. Making close connections with trains of all transcontinental lines, passengers are given their choice of routes to Chicago, Louisville, Memphis and New Orleans, and through these points to the far east.

Prospective travelers desiring information as to the lowest rates and best routes are invited to correspond with the following representatives.
B. H. Trumbull, Commercial Agent, 142 Third St., Portland, Ore.
J. C. Lindsey, Trav. Passenger Agent, 142 Third St., Portland, Ore.
Paul B. Thompson, Passenger Agent Colman Building Seattle Wash.

Popular and Picturesque.
The only thing necessary to make the Denver and Rio Grande the most popular, as it has ever been known the most pleasant and most picturesque way to cross the continent, has come about. This is the establishment of through sleeping car service.
In connection with the O. R. & N. a through Pullman Standard Sleeper is now run from Portland to Denver, leaving Portland at 8.15 p. m., arriving at Salt Lake at 8.40 a. m. the second morning, leaving Salt Lake at 3.50 p. m. and arriving at Denver 4.20 p. m. the following day. This schedule gives passengers seven hours stop-over in Salt Lake, affording an opportunity to visit the Mormon Capital as well as a day light ride through the grandest scenery in the world.

For reservation in this car and for illustrated booklets picturing the scenery contiguous to the Denver & Rio Grande, proving it to be the "Scenic Line of the World," write to W. C. McBride, General Agent, 124 Third street, Portland.

If You are not Particular don't travel over the Illinois Central, as any old road will do you and we don't want your patronage; but if you are particular and want the best and mean to have it, ask the ticket agent to route you via the ILLINOIS CENTRAL, the road that runs through solid vestibule trains between St. Paul, Omaha, Chicago, St. Louis, Memphis, and New Orleans.

No additional charge is made for a seat in our reclining chair cars which are fitted with lavatories and smoking rooms, and have a porter in attendance.
Rates via the ILLINOIS CENTRAL are the lowest and we will be glad to quote them in connection with any transcontinental line.

Deafness Cannot be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. Cheney & Co., Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

GAITS OF THE SADDLE HORSE

There is no doubt that the horse is its every variety a live proposition nowadays, which farmers are showing a disposition to handle to the best advantage. In this connection perhaps the saddle horse is less talked of than other classes, yet interest in it is not wanting. To a man who has a four-year-old mare—a natural trotter—and is considering training her for a saddle horse E. P. Mayo of Maine says in Rural New Yorker:

To make an ideal saddle horse of his mare the inquirer should have commenced at least two years ago, but if she is, as far as a very sensible and he will be a little more patient the desired result can be accomplished now. The first thing to be attained is to make her a good walker, for a slow or bad walking saddle horse is about the worst thing out, and she must be taught that the walk is a distinct gait as much as the canter or the gallop. He should not be satisfied until he can get her to walk from five to six miles an hour. Of course if she is naturally a fast walker this can easily be accomplished, but she should never be allowed to trot while taking her walking lessons, for it is as much a misdeed to let a mare walk to break her legs as to let a trotting mare to break her legs. To acquire the walk she requires no special training, but she must practice, at all times urging her to go as fast as possible without tiring, and not making her less than a mile an hour.

The next thing to get is the jog trot, which is an hour, some-

PAID UP SADDLE HORSE
[Noble, 1880, Dimoc, Michigan, The horse is 10 years old and was bred in Spain. The position in the picture is the Spanish step. One of a pair of high school movers. He forms twenty-one. Farm, 1880, Dimoc, Michigan.]

thing to be done, and always to be discouraged, the true trot, in which the animal moves naturally and with frictionless joints. The third is known as the flying trot or speed gait. The true trot of a horse is the trot that this mare must learn if he would have her accomplished in the different gaits. When this is accomplished—and it is equally as easy as the walking gait—the next is the canter, or slow gallop, and the horse should go from the walk or trot either to the canter at will of the rider. The right fore leg should be made to go forward first, or, rather, to take the lead. In training for this gait the horse should be kept well in hand by the bit and while being urged forward bend the head slightly in the opposite direction from which the fore leg is to lead, and with a very little practice the horse will understand from the leaning of the head what is wanted and strike an easy, natural canter. If an out and out gallop is required, when the horse makes the first leap forward with forefoot well extended and you see that he understands what is required give him his head slightly and urge him to make still greater effort.

The Future in Hogdom.
Summarizing the various opinions now audible in market circles, Breeder's Gazette obtains three views of the future in hogdom: "One, emanating from Packintown, is that a sharp decline in values is assured whenever the summer run of 'grass widows' is cut loose. It is on this supply that killers are banking their hope of filling cellars. Another view is in the permanency of present prices, which the country appears to share. It is based on light stocks, urgent demand and figures that indicate a normal summer run. There is a third element that stakes its reputation on the materialization of the seven cent hog, insisting that if packers abandoned their present hand to month attitude prices would jump 50 cents per hundredweight. Packers favor lower prices for both hogs and product. Hog product is now selling dangerously near the limit or disposition of the consumer to pay."

Needs of Young Alfalfa.
Spring sown alfalfa needs to be run over with a mower every three or four weeks to keep the weeds down. The cutter bar should be set high, and the mowing should be done only when the alfalfa is dry and there is no appearance of rain. August sown alfalfa does not need to be touched the first season. Stock should be kept off alfalfa until it is a year old at least, and if it is desirable to maintain a stand on a field for ten to fifteen years stock should be kept off until it has passed its third year.—H. M. Cottrell.

Benefits of a Clean Barnyard.
Keep the barnyard free from manure and house flies will be far less troublesome. To remove daily the freshly made manure to the field or pasture serves a double purpose—first, the maximum value of the manure is secured; second, that household pest, the fly, is largely avoided.

Good Sheep Require Good Pasture.
Mutton breeds of sheep do not depend on waste lands and hillsides to become profitable. Good sheep require good pastures and pay well.
