":.UCKY" BALDWIN.

iwind of Speculation In the

185. a little party of gold seekers with a meager outfit of horses and wagons started for California from the village of Racine, Wis. In command of this adventurous expedition was a young a an who took with him his wife and inf. at daughter. His name was E. J. Daldwin and he made a wise choice in spaking from his restless feet of a tamer civilization. He larger theater of action for his pent-up and surging activities. While trailin: brough the mountains of Utah ors were attacked by Indians. who w

beaten off during a six hour fight 1. which young Baldwin killed their c of. After six months of hardparty renched Haugtown (later ship th acerville), in California. Here Baldwin tarried and began

placer tining. He appears to have been n more than an ordinary red shirted rgonaut, meeting the ups and downs I mining lock until the discovery of the Comstock lode at Virginla City. Thither he drifted and discovered that his natural bent was gambling with the mines that other men bad o ned. Amid a whiriwind of specula on he fought his way with such su cess that he loomed from the smoke in a few months as "Lucky" Baldwin the man who had cleaned up \$7,500,000 in the gigantic deals in the stock of the Ophir mines.

San Francisco was the Mecca of those lucky sons of fortune who were rearing a great city by the Golden Gate. As a stock and mining speculator "Lucky" Baldwin shone respen-dent, but he was also a loyal son of San Francisco. He built hotels and theaters and business blocks even while he was amazing that far from conservative community by madly

freakish extravagances. In a very lucid interval he bought all the Spanish grants he could find near Los An eles and there spent a million in making this ranch of his not only a splendidly productive property, but also one of the most beautiful estates ever laid out in this or any other country. It was his hobby, his pet, and he planted miles of avenues with noble shade trees and made wonderful tropical gardens, surrounding his home by a paradise of vernal beauty.-Ralph D. Paine in Outing Magazine.

"TELL IT TO THE MARINES."

Pepys' Version of the Origin of the Expression by Charles IL.

The saying, "Tell it to the marines," is traced to Pepys, the author of the famous "Diary," and it is said by him to have originated with Charles II. of England. "It so befell," as the story goes, "that his light hearted majesty, with an exceedingly bored expression on his swarthy face, was strolling in the shade with the ingenious Mr. Pepys, secretary to the admiralty. "I had speech yester'en at Deptford,' said Mr. Pepys, 'with the captain of the Defryance, who hath lately returned from the Indies and who told me the two most wonderful things that ever, I think, I did bear in my life.' Among the stories told were of fish flying in the air. 'Fish flying in the air!' exclaimed his majesty. 'Ha, ha! A quair conceit, which 'twere too good to spoil wi' keeping. What ho, sir'-he turned and beckoned the colonel, Sir William Killigrew of the newly raised maritime regiment of foot, who was following in close conversation with the Duke of York-'we would discourse with you on a matter touching your own element. What say you, colonel, to a man who swears he hath seen fishes to fly in the air?'

"'I should say, sire," returned the sea soldier simply, 'that the man hath sailed in southern seas, for when your majesty's business carried me thither of late I did frequently observe more flying fish in one hour than the hairs of my head in number.'

"Old Rowley glanced narrowly at the colonel's frank, weather beaten face. Then, with a laugh, he turned to the

secretary.

"'Mr. Pepys,' said he, 'from the very nature of their calling no class of our subjects can have so wide a knowledge men of our loyal maritime regiment. Henceforth 'ere ever we cast doubts upon a tale that lacketh likelihood we will first tell it to the marines."-Army and Navy Journal.

Weight of a Piece of Ice. A rough and ready method of calculating the weight of a piece of ice is afforded by the fact that a cubic foot of this substance weighs approximately 57.25 pounds. First measure the breadth, length and height of the cake, and the three results, being multiplied, will give the number of cubic inches. If this answer be in turn multiplied by .033 the approximate number of pounds will result. For instance, a cake 8 by 9 by 10 inches contains 720 cubic inches. This multiplied by .033 gives 23% pounds, the correct weight of such a piece of lee.

Wrong Either Way,
