Lake County Examiner

VOL. XXVII.

LAKEVIEW, LAKE COUNTY, OREGON, THURSDAY, DEC. 20, 1906.

NO. 51.

IRRIGATION PRO-JECT ASSURED.

The Hewitt Land Co. to Begin Survey at once.

PROJECT WILL COST \$300,000.

Construction Will Begin as Soon As Plans and Surveys can Be Completed.

(Special to The Examiner.)

Mr. M. Swartout of Tacoma, Washington who was expected in Lakeview last week and who represents the Hewitt Land Co , in Oregon, was unavoidably detained but the following statement was forwarded by him to The Examiner for publication:

"In August of 1906, Mr. M. Swartout and Mr. C. H. McKendree came to Lakeview for the purpose of inspecting the possibilities of an Irrigation project in Goose Lake Valley. The conditions existing on the West side were found so favorable that the port purchase of lands tributary to Drews Creek was conidered a safe investment. F. M. Miller of the Bank of Lakeview and Mr. C. H. McKendree were authorized to make such purchases as they might deem advisable, and Mr. McKendrec has, since that time, acquired title to several thousand acres of land. The unbounded faith of this company and its_representatives in the future of Lake county, and in Goose Lake Valley in particular, has led them to spare no expense in investigating the possibility of reclamation of what would now be considered arid lands.

For this purpose the services of Mr. M. D. Williams, a Civil Engineer, now located at Klamath Falls were retained, and he has been for the past two months engaged in making a study of the lands, reservoir sites and the water supply, and has submitted a favorable report on the entire project. Mr. Williams is an Engineer of exceptionally varied experience as regards irrigation, having followed that particular line of work for the past ten years throughout the entire West. Four years of that time having been with the U. S. Reclamation Service as Reconnaissance Engineer, which work has made him familiar with the conditions existing on the Projects of the U. S. Reclamation in the 17 Western States and with the private systems adjacent to them. This familarity with Irrigation matters has led the Co. to place implicit faith in his judgment.

The Engineers' report having determined the feasibility of the Project it is now the intention of the Company to proceed with the work of contsruction as soon as the necessary details can be arranged and weather condi-

tions will permit. It is hoped that water may be furnished for the Irrigation of approximately 30,000 acres of land, the larger portion of which will be in private ownership.

The present plan of the Company is to furnish water at the smallest possitle cost to the Land Owners, and to

their pro rata amount of the cost.

mation Service, which is that the title terests of the above Company. to the works and the water will be revenue from the Irrigation works Stock Holder.

The foregoing will show the successful completion of the project is entirely dependent upon the co-operation of the people in the matter of signing their lands, and it is hoped that when the proposition is submitted to them that it will meet with their approval and be deserving of their sup-

Western Pacific Through Lake and Klamath.

The Klamath Falls Republican last week copied the Examiner's article ley, and adds the following:

For the last two months this promated, will change the face of the rail-Chas. Easton was up from Pine road map in this great Inland Empire. The prominent factor in the movement at this time is the Hewitt Land company of Tacoma, Wash.

Up until about six months ago there were in the field several corps of engineers seeking a feasible route for the Western Pacific through Oregon and Washington, into Portland, Tacoma and Seattle. During this time the Northern Pacific had men in the field doing a like work for a route to San Francisco. Suddenly orders were issued recalling these engineers.

The reason for the sudden recall was not accounted for until The Republican published its article of last August. It was then made known that Hill, on learning the purpose of Gould, and not caring for an antagonist of his mettle, made the proposition that both roads meet at a point to be agreed on later. From this common point each should use the other's tracks, one north, the other south. This agreement gave Hill and Gould what they need and joined the forces of Harriman's worst enemies. After a careful reconnoissance Lake county was decided on as the meeting point, thus placing both roads in close proximity to a great territory for trafflic -- the great Klamah country. The next step was the construction of a line into Klamath couny. Several gentlemen came to Klamath Falls, ostensibly with the Portland excursionists on a sight seeing expedition; in reality to see what could be done towards the line from Lakeview. These gentlemen had been approached before in an effort to interest them in the Carroll project. A cursory examination of the enterprise convinced them of its practicability, and in the course of their investigations they became acquainted with the Hill-Gould agreement, for one of them, Mr. Hewitt is pretty close to Mr. Hill. When Hewitt and his party came here

they divorced themselves from the Portlandites and made their headquarters at the Henley ranch, Carroll's home. Many excursions were made from this point, including in which
