Family liquors at Post & Kings
We have a full set of Myself-Rollins & Co's., samples of Stock Certificates and bonds, with price list. If you are organizing a stock company get our prices on stock certificates. If

Secretary Hitchcock has withdrawn his acceptance of the resignation of Michael T. Nolan as Register of the Dallas Land Office and ordered a thorough investigation of the office, particularly with a view to ascertaining the facts regarding charges made by Nolan against Malcolm A. Moseley. Nolan's statement that accompanied his resignation and which at first was set aside without action, had been reconsidered and presents a situation that, in the opinion of President, cannot be ignored. Either the Register or the Receiver of the office has been guilty of conduct that warrants dismissal.

At all events, the office is not big enough to run with Nolan and Miss Lang, the Receiver, and it has been deemed advisable, before taking any action whatever to ascertain who is at fault.—Oregonian.

We print township plats. If
Dutch lunch at the Brewery Saloon. If
Mining blanks at the Examiner office.

The Examiner prints township plats, and makes them into books to order. If
Look at the descriptions of the land listed with The Examiner this week for sale, and select your piece before it has been sold to some one else. If
Samples of the Denison shipping tags at The Examiner office. All sizes and qualities, from Manila to linen. If

Blanks for final proofs, Desert proofs timber land final proofs and blank affidavits for applications for readvertisements, blank witness' affidavits, etc. at The Examiner office. If

There is two ways to tell a good cigar; one is to buy it, pay your money and smoke it. But the better way is to know that it is an Eagle or a Mountain Rose, which is absolute proof of its genuineness. Made and for sale by A. Storkman, at the cigar factory. If

We are now prepared to sell several tracts of land at prices that will startle you, especially if you are acquainted with the location. We have land all the way from \$1.50 per acre up to \$15; unimproved or improved, to suit the purchaser. Lake County Examiner. If

See a sample of the Pacific Monthly at this office, and you will not hesitate to pay \$2.50 for a year's subscription to The Examiner and that valuable Magazine published in Portland. If

Farmers, have your butter wrappers printed at The Examiner office, instead of sending away for them. You keep your money at home, and patronize them that patronize you, besides, you see what you are getting and don't have to pay for it if it doesn't suit you. If

If any subscriber of the Examiner wishes to subscribe for "Tom Watson's Magazine," we will accept \$1.50 from them, write the letter, buy the postal order and send for the magazine to any address. There is but one price on "Tom Watson's Magazine," and we do not club with it, but as a matter of accommodation to subscribers to the Examiner we can get them the magazine without any trouble or risk to them for the regular price. If

THE 1907 WORLD ALMANAC

is richly weighted, with information on almost every conceivable subject and is a marvellous repository of facts, figures and cyclopedic knowledge well nigh indispensable to every one who needs to refer to recent historical, political or general happenings.

Within its covers may be found 10,000 facts and figures, embracing almost almost every subject of daily interest.

It is the one book that tells you something about everything and everything about a great many things.

Over 600 pages, strongly bound in an illuminated cover.

Now on sale all over the United States for 25 cents.

Mailed to any address for 35 cents by the Press Publishing Company, New York City.

Final Proof Notice.
Land Office at Lakeview Ore., Jan. 22, 1907.
Notice is hereby given that Charles E. Campbell of Paisley, Oregon, has filed notice of his intention to make final five year proof in support of his claim, viz: Homestead Entry No. 2504, made Feb. 6, 1902, for the E 1/4 NE 1/4 Sec. 3, and W 1/4 NW 1/4 Section 1, Township 33 S, Range 22 E, W. M., and that said proof will be made before Register and Receiver, at Lakeview Oregon, on 9th day of March, 1907. He names the following witnesses to prove his continuous residence upon, and cultivation of, the land, viz: J. F. Clarkson, and Willard Duncan of Lakeview Oregon, P. J. Brattain and Fred Pike of Paisley, Oregon.
J. N. Watson R

Deafness Cannot be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. Cheney, & Co., Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

FARM GARDEN

SLAUGHTERING HOGS.

Convenience For Butchering on the Farm.

It is an easy matter to plan an ideal equipment for butchering hogs and caring for the product—on paper. One could figure out just the form of tables and scalding vats that would afford the greatest convenience, but such description would be of small practical benefit, because the average farmer has no use for such equipment for only a few days in the year. Slaughtering devices must therefore be simple, inexpensive and such as will not take up needed room when not in use.

The accompanying illustration, as described in American Agriculturist, are

TUB FOR HEATING WATER.

given with this idea in view. Three important points arise in considering fall butchering upon the farm where the object is simply to secure a supply of meat for family use. First is the easy and convenient heating of water; next, the making of a simple table and scalding receptacle; lastly, a simple device for smoking meat, for it is not often that a closed room can be given up to this special use.

The first cut shows a big galvanized iron wash tub set upon a few bricks piled up for the occasion. A small fire can be built beneath, which will, of course, melt off the coating of zinc on the bottom of the tub, but this will do no great harm. Such a tub can be purchased anywhere. It should be set up close to the slaughtering table, and when the water in the tub is hot two men lift the tub by the handles and pour contents into the scalding vat. This latter may have a blanket thrown over the top if another tubful of water must be heated. This is much more convenient to heat water than by means of a set tub, from which all the water must be taken out in pails and carried perhaps a considerable distance.

The slaughtering table and vat are shown in the second cut. The vat is a sugar hogshead. Make two wooden boards exactly as high as the hogshead and arrange two wide, stout boards, as shown in the cut, with the "tackle" above, suspended from a beam or from a tripod of three stout poles set up over the table and chained

TABLE AND VAT.

together near the top. The hog can be lowered into the tub of scalding water by slipping the boards to one side, these being slipped into place again when the carcass has been hoisted out.

Effects of Irrigating Sediments.
With such crops as wheat, barley and corn, in which the ground is plowed, disked or cultivated in a manner impossible with alfalfa, the sediment blanket is broken up, turned under and incorporated with the soil. In this situation not only is the blanketing effect lessened or done away with, but the sediments are free to exert a fertilizing influence or otherwise, impossible so long as they lie upon the surface inaccessible to the roots of plants, says S. Fortier.

If therefore sediments of beneficial character preponderate in such a mixture the result of their incorporation with the soil will be favorable, and vice versa.

Farm Brevities.
Those who have no silos will find it not only more economical, but better for the live stock, to run all the hay and corn fodder through a cutter.
Put the sleighs, hobs and sleds in order before snow flies, and then when they are wanted they will be ready.
Make the pigpens warm and comfortable. Don't be afraid to give the pigs a warm bed. Frozen swill has caused a loss of many a good porker.
Look out for decaying vegetables in the cellar. A few will soon cause the loss of a great many.
Sawdust makes excellent bedding and can usually be had for a dollar a two horse load.—Country Gentleman.

Grinding Grain For Sheep.
Sheep are better fitted than other animals to grind their own grain, consequently it is not necessary to do this work unless the sheep have poor teeth. Valuable breeding ewes are sometimes kept until quite old, and their feed should be ground.

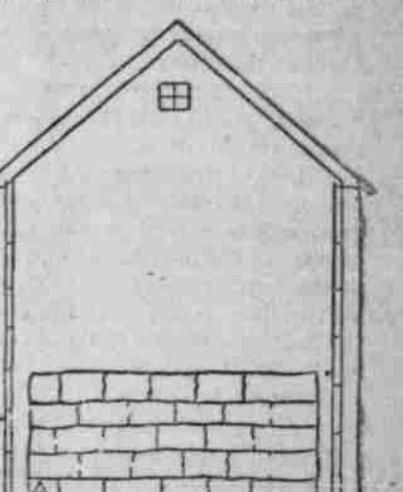

ICE HOUSE.

A Quickly Built Structure Proves Satisfactory.

For many years hundreds of farmers have gone without ice during the long, hot summers because they supposed it would cost considerable money and time to secure and preserve the frozen fluid. But at very little expense an ice house can be constructed that will hold and keep well all the ice needed for any farmer's family.

For several years we used a small cheap ice house that kept the ice as well as a more costly building constructed over twenty years previously. Some have an idea they must forgo the luxury of ice on account of expense, when almost any kind of a shed will preserve the ice very well, provided it is properly packed.

Our last ice house was a cheaply constructed shed that took less than a day's work in its construction. We used white oak poles set into the ground about two feet. Some cheap hardwood bill stuff of 2 by 4 and 2 by 6 pieces were used for plates, nails, braces and rafters. A fair grade of pine stock boards twelve inches wide were used for siding. The siding was nailed on the inside of the poles horizontally the better to resist lateral pressure from the packed ice and sawdust. A better grade of stock board one foot wide furnished a good roof. Such a board roof should be made quite steep to shed water. The rafters cut on each edge of the roof boards make the roof practically water tight. Fifteen inches should be left between the ice cakes and the walls, as shown in the cut. Locate the ice house where good natural drainage may be secured. Tile may be laid to secure more adequate drainage if needed.

CROSS SECTION OF ICE HOUSE.

We always put in one layer, then fit it as closely together as possible. Then we shove over the upper surface of all the cakes with a carpenter's adz. The shavings of ice were swept into the crevices between the cakes. When freezing cold a little water was sprinkled over the whole surface to cement the layer solidly together. As each layer is completed the sawdust should be filled in around the sides level with the top and solidly tamped down. Allow no sawdust to remain on top of any layer of ice while filling. Fig. 2 shows the sixth layer in and ready for the sawdust. Ice is preserved by being packed away from the air. As hot weather comes on the ice will settle some. Be sure to keep the sawdust tamped down around the sides frequently during early summer, and see that no air holes form, advises a writer in Hoard's Dairyman.

When the ice is packed in, cover with ten to fifteen inches of sawdust. Leave the gables open more or less to allow free circulation of air over the ice. Remember there will be some waste during the hot summer months, no matter how much pains are taken, and this would be true in the more costly ice houses.

Checking Rot in Potatoes.
A thoroughly satisfactory treatment for checking rot in potatoes is yet to be found. What has proved best in my experience is, first, keeping the storage cellar at a temperature as near 35 to 38 degrees as possible; second, sorting the potatoes after they have completed their sweat in case any indication of wet rot is shown to prevent the rot spreading from the decaying tubers to the sound ones. Dry rot is very rarely if at all transmitted from one potato to another, according to a writer in Orange Judd Farmer.

If the potatoes are left in pits in the field to sweat prior to putting them in the cellar they will usually show rot that may be in them when they are taken from the pit. Potatoes which are nearly clean of dirt usually show more rapid spread of the wet rot than do potatoes which are covered with a considerable coating of dry soil. Possibly the reason for this may be the fact that the dry soil is not a good medium for passage of the rot from one potato to another.

A Few Reflections.
The man who keeps books learns to turn everything to account.
The farmer with a well filled silo and a cellar full of mangels is well shod for winter travel.
Work smartly to save all the barnyard manure you can. You will soon want it to put on the spring crops.

Molasses For Feeding Steers.
Some tests made in Texas of the value of black strap molasses for feeding steers lead to the conclusion that the addition of molasses to a fattening ration has always produced an increased gain. Addition of molasses to a ration of cornmeal and hulls lowered the cost of gains.

The Leading Paper of the Pacific Coast

The San Francisco Chronicle

The Weekly Chronicle
The very best weekly Newspaper published in the entire West.

\$1.50 a Year
Including postage to any part of the United States, Canada and Mexico

It is best because, besides printing all the news of the world each week in an interesting way and ably illustrating many articles, it has special departments devoted to—

- AGRICULTURE
- HORTICULTURE
- POULTRY
- LIVE STOCK
- MINING
- LITERATURE
- FASHIONS
- AND SPORTS

These are presided over by editors having a thorough knowledge of their specialties. The pages devoted to Agriculture, Horticulture, Poultry and Live Stock are well illustrated and filled with matter of the greatest interest to all engaged in these industries, every line being written by those who are in close touch with conditions prevailing on this Coast.

SEND FOR SAMPLE COPY. It will be sent free.
