**CATARRH**  
Lakeview, Oregon, March 2, 1907.  
Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada and Washington Territory", as extended to all the Public Land States by act of August 4, 1892, Charles E. Hadley, of Klamath Falls, County of Klamath State of Oregon, has this day filed in this office his sworn statement No. 3544, for the purchase of the SE 1/4 SW 1/4 S 1/4 SE 1/4 & NE 1/4 SE 1/4 of Section No. 25, in Township No. 35 S., Range No. 17, E. W. M., and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before the Clerk of Klamath Co. Ore., at his office at Klamath Falls, Ore., on Tuesday, the 4th day of June, 1907. He names as witnesses:  
C. K. Brandenburg, of Klamath Falls Ore.  
C. H. McCumber, of Dairy Ore.  
C. H. Dusenberry and Frank H. Hall of Klamath Falls Ore.  
Any and all persons claiming adversely the above described lands are requested to file their claims in this office on or before said 4th day of June, 1907.  
13-10 J. N. Watson, Register.

**ELY'S CREAM BALM**  
This Remedy is a Specific, Sure to Give Satisfaction. GIVES RELIEF AT ONCE.  
It cleanses, soothes, heals, and protects the diseased membrane. It cures Catarrh and drives away a Cold in the Head quickly. Restores the Senses of Taste and Smell. Easy to use. Contains no injurious drugs. Applied into the nostrils and absorbed. Large Size, 50 cents at Druggists or by mail; Trial Size, 10 cents by mail.  
ELY BROTHERS, 56 Warren St., New York.

**The Shepherd And His Flock.**  
Give the lambs a creep. A creep is not only a necessity, but to the little fellows it is a real luxury. The trough in this creep should be smoothly planed and kept scrupulously clean and no stale food left to sour. We have found a trough made of light lumber two inches high and a four inch bottom to be most satisfactory, writes an Ohio breeder in American Sheep Breeder. It should have a solid foundation and a lid hinged on, so as to keep it closed when not in use. The food should consist at first of a sprinkle of food composed of ground corn, oats or barley, a little coarse wheat bran, with very little oilmeal. As the lamb grows older the ground feed can be gradually changed to the whole grain. In addition to the above, provide good bright alfalfa. You will not have to teach the little fellows to eat alfalfa. Nature has already taught them what alfalfa was made for.  
Do not be in too much of a hurry to get the lambs out on pasture. Better wait awhile and keep them up until the new grown grass has to some degree passed its watery stage. Even then it is best to bring them in evenings and let them have the advantage of the creep with a little dry feed and a nip of alfalfa.  
After turning to pasture comes the most trying time in the future of the lamb, often turned out with only the care of the mother sheep. Parasites in all their various forms are ready to prey upon the young and tender offspring. The flock master is too busy to give the attention he should to the flock, and through his negligence at weaning time he has a hospital full of weak, emaciated lambs. What is the remedy? We have no remedy to give. We prefer a preventive if it can be found. So far in our sheep breeding,

**Dairy Creamery**  
Experiments at the Oklahoma Agricultural college illustrate what can be done in the dairy business in any section where a sufficient number of cows are kept to warrant starting a factory and when the farmers will stand by the factory and have confidence in its management and see to it that it is managed successfully.  
The patrons have always been willing to deliver sweet cream to the creamery, and to this one fact is attributed much of the success. The butter has been placed on nearly every market in the south and west, and it has never been wanting a buyer. It sells at the top of the market, which enables the creamery to pay a premium for the cream received. Herein lie the hopes of the successful development of dairying in Oklahoma. The price that the farmers receive for their cream depends upon the quality of the product of the factory, and it should be the highest aim of the cream producers whether they patronize an independent creamery, a centralized creamery or are shareholders in a cooperative creamery to deliver to the creamery the best cream that they can possibly produce.  
Milk and cream take up odors and taints from unclean vessels in which they may be placed or from any substance emitting an odor. They are easily spoiled and made unwholesome for food if any dirt or filth gets into them, or if they are covered up tight so that fresh air does not get into them, to remove the odors and gases which may be forming in them.  
A Guernsey's Great Record.  
The third test recently concluded of the Guernsey cow Dolly Bloom shows the remarkable total of 17,207.51 pounds of milk, with an average test of 4.84 per cent of butter fat, an equivalent of 836.21 pounds of butter fat. In the three years in which she has been tested, in two of which she was but a heifer, she gave 38,813.92 pounds of milk and 1,914.1 pounds of butter fat, or an average of 12,927.97 pounds of milk and 638 pounds of butter fat for each of the three years, and considerably more than 6,000 quarts of very rich milk for the three years, including the two years' heifer record.  
The feed of the past year's test may be inferred from the ration for February, which was for each day: Three pounds mixed wheat feed, three and three-quarter pounds gluten, three and three-quarter pounds oilmeal, three pounds middlings, three and three-quarter pounds oats, with about twenty-five pounds of silage and a varying amount of mixed hay, carrots and turnips. The quantity of feed was about the same from month to month, but the kinds of grain were varied. In the summer she had access to good pasturage in addition to the grain ration.  
This cow is a member of the well known herd at Langwater farms, North Easton, Mass. Dolly Bloom's wonderful record, says American Cultivator, places her at the head of the Guernsey breed.

**DOLLY BLOOM.**  
SHEPHERD RAM.  
which covers a period of nearly fifty years, we do not remember ever but once having this trouble to contend with, although our pasture for our aged sheep has been used continuously as a permanent pasture during all these fifty years. Our first experience set us to thinking. We consulted Youatt, Spooner, Randall, Stewart and others and made up our mind the thing to do was to exterminate the germs in embryo in the stomach of the ewes, if possible.  
Sheep, as well as all other kinds of stock, crave salt, and when allowed to partake at will take only so much as nature requires. Our method now is to keep constantly before them medicated salt, either commercial or of our own home mixture, which consists of salt dampened with spirits of turpentine and a light sprinkle of sulphate of iron. When weaned—and we want to wean early—we bring them to the barn and allow them access to their creep. In the evening turn them out on fresh meadow pasture, or what is still better, a newly seeded meadow. When the sun begins to grow hot on the following day they are again driven to the barn, where they remain during the heat of the day.  
The illustration shows the champion Shropshire ram at the international live stock exposition at Chicago.  
Breeding From Twins.  
For many years I have kept a small flock of Devon Longwood ewes, and the singles naturally getting fat, I have always sold them to the butcher, keeping only the twin ewe lambs as breeders, writes a breeder in Farmer and Stock Breeder. The last three or four years the number of twins, triplets and generally one or two fours in my flock has been very much larger than that of my neighbors. But whether breeding only from twins be the cause of such an increase I should not dare to say. The ewes when with the ram are only kept, as usual, in ordinary old pasture, and only one ram to eighty ewes. This year's record so far promises to keep on the usual lines, as up to date twenty-three ewes have had fifty lambs—viz, three singles, fourteen twins, five triplets and one four.  
Hints For the Goat Breeder.  
A speaker at the Dallas goat show said: We prefer March kids. That is what I nearly always aim to have. We shear sometimes in February, sometimes earlier, sometimes later. We do not shear until winter is past. In preparing goats for a show I find that one of the first things is to keep them free from lice. But I have found, too, that too much grain is a detriment. If an animal gets too fat that will stop the growth of the fleece. Why, I don't know. The first time I noticed it I had one goat in particular that I was taking much pains with and expecting to get into a very fine show animal. It did not, for it had too much grain, and I think that along that line it affects the goat. A man wants to feed certain amounts, but not to overdo the thing. There is such a thing as overfeeding. In my goats I look out for their feet particularly. They are subject to foot trouble, and when a goat gets his feet in bad condition he will not thrive.

**IF YOU WANT CASH FOR YOUR REAL ESTATE OR BUSINESS I CAN GET IT**  
No Matter What Your Property is Worth, or in What Town, City, State or Territory it is Located  
If I did not have the ability and facilities to sell your property, I certainly could not afford to pay for this advertisement. This "ad" (like all my other "ads") is practically sure to place on my list a number of new properties, and I am just as sure to sell these properties and make enough money in commissions to pay for the cost of these "ads," and make a good profit besides. That is why I have so large a real estate business today.  
Why not put your property among the number that will be sold as a result of these "ads?"  
I will not only sell it—some time—but will be able to sell it quickly. I am a specialist in quick sales. I have the most complete and up to date equipment. I have branch offices throughout the country and a field force of men to find buyers. I do not handle all lines usually carried by the ordinary real estate agents. I MUST SELL real estate—and lots of it—or go out of business. I can assure you I am not going out of business. On the contrary, I expect to find, at the close of the year, that I have sold twice as many properties as I did the past year, but it will first be necessary for me to "list" more property. I want to list YOURS and SELL it. It doesn't matter what it is worth, or where it is located. If you will fill out the blank letter of inquiry below and mail it to me today, I will tell you how and why I can quickly convert the property into cash, and will give you my complete plan  
**FREE OF CHARGE**  
and terms for handling it. The information I will give you will be of great value to you, even if you should not sell. You had better write today before you forget it. If you want to buy any kind of a Farm, House, or Business, in any part of the country, tell me your requirements. I will guarantee to fill them promptly and satisfactorily.
