**TIMBERLAND NOTICE.**  
United States Land Office, Lakeview, Oregon, Sep. 3, 1907.

Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and Washington Territory," as extended to all the Public Land States by act of August 4, 1892, Christopher C. Cannon, of New Pine Creek, county of Lake, State of Oregon, has this day filed in this office his sever statement, No. 375, for the purchase of the Lot 1 Sec. 15, Lot 1, of Section No. 24, in Township No. 31 S., Range No. 21 E., W. M., and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before Register and Receiver at Lakeview Oregon, on Saturday the 10th day of November, 1907.

He names as witnesses: J. L. Cannon, Alfred Coomes, Frank Griffith, T. A. Arnsden, all of New Pine Creek Oregon.

Any and all persons claiming adversely the above described lands are requested to file their claims in this office on or before said 10th day of November, 1907.

J. N. Watson, Register, 30-10

**Final Proof Notice.**  
Department of the Interior, Land Office at Lakeview Oregon, Oct. 21, 1907.

Notice is hereby given that William T. Kinney, of Lakeview Oregon, has filed notice of his intention to make final five year proof in support of his claim, viz: Homestead Entry No. 2018 made April 22, 1902, for the SW 1/4 Sec. 12, SW 1/4 Sec. 10 and NW 1/4, Sec. 12, Township 37 S., Range 20 E., W. M., and that said proof will be made before the Register and Receiver at Lakeview Oregon on 25th day of November, 1907.

He names the following witnesses to prove his continuous residence upon, and cultivation of, the land, viz: Frank Wilson, Otto Hardisty, John Hardisty, Chas. Galtier, all of Lakeview Oregon, J. N. Watson, Register, 42-5.

**QUAINT COATS.**

Big Brooches All the Go—Pierrot Pom-poms of Tulle.

Big brooches set with a single large stone are all the go. Amethysts and topazes seem to outnumber other transparent stones used for these big brooches. Well cut topaz plus green

FOR A FINE BOW-TIE

He living bow, but the beautiful pins give with a noise-softened tulle. To give of the elegance of fashion which has played such an important part in the scheme of costume this season the latest innovation is that of immense flower-embroidered tulle in different colors, a quality of tulle often being used as black lace. Many have yellow, blue lined and grey represent the most successful scheme.

Brooches, like wide and straight collars, contribute to the style and become more and more popular. The lighter shades give a fresh, airy effect, while a soft, high collar with a wide, high collar is the most successful scheme.

Trimming on skirts are confined to one class only, and that is of wide bands or straps, most put placed at the hem or both ends of the skirt.

Active, smart, but a regular carrier in which they can find their way will be happy to their hearts' content. Here is a suit that perfectly fits these conditions, which can be made from a variety of materials. To see illustration while ladies' heads to read.

JUDIC CHOLLET.

**SILOS AND SILAGE.**

A well known dairyman says of the silo: "To my mind the only question for the small farmer to decide is whether he has enough land to produce enough corn and hay, pasturage or soiling crops to feed enough animals to make a silo possible. Of the economic importance of the silo as a container and conservator of food in the best condition for cows especially I am as certain as a farmer can be of anything."

**Stone and Cement Silos.**

If the different kinds of silos are properly built, there will be no difference between them, so far as the quality of the ensilage is concerned, says Hoard's Dairyman. They will all keep silage equally well. The difference between a stone and concrete silo is entirely one of cost and convenience of building. A stone silo needs a mason to lay the stone properly, while a cement silo can be built by unskilled labor. The only advantage a cement silo has over a wooden one is in its lasting qualities. Properly built, a stone or cement silo will last indefinitely, while a wooden silo is good for fifteen to twenty years, depending on the kind and quality of the wood used.

**Makes Dairying Profitable.**

Professor B. H. Rowl says of the silo: "In the majority of cases you cannot run a dairy profitably without a silo. I unhesitatingly recommend it to every dairyman as one of the cheapest means of producing the best results. Silage takes the place of green stuff in winter and keeps the cattle in good, healthy condition."

**A Valuable Food.**

Silage is very low in protein and yet is a very valuable food. In fact, silage has not as much protein ton for ton as oat straw. It is valuable because of its succulence and as an aid to digestion. Everything that the cow eats the silage helps to digest. Mr. Gillett understood this or he would not have fed Colantha 4th Johanna thirty pounds per day of it during the sixty-three days' test, but he realized that he could not feed a cow as much grain as he was feeding without having some succulent food with it, to keep the digestive organs in a healthy condition.

**The Stave Silo.**

The stave silo, if well made and rightly put up, is usually satisfactory. I believe it is wisest for those who want stave silos to purchase them from some reliable firm. The wood should be right and the staves well fitted up and tongued and grooved and then put together just right. I have visited many feeders who are using and have used for a considerable time different makes of stave silos, and almost invariably they speak well of them, and I cannot recall a single instance where the silage was not good. Home made stave silos have given much trouble and wasted cargoes of silage.—L. W. Lighty in National Stockman and Farmer.

**For apple custard use five eggs well beaten to a quart of milk, stir in a pint of apple sauce, sweeten and flavor to taste and bake carefully. Set the custard into a pan of water in the oven to prevent burning.**

**MODES OF THE MOMENT.**

**Attractive Frocks in Linen and Pique.**

Immense Flower Trimmed Hats.

Linen and pique are perhaps the most modish wash materials of the season and are shown in a wide range of colors from the pastel tints to the more practical browns and blues and checks. Some handsome costumes trimmed in lace are made in these piques.

The latest hats are immense both as to shape and trimming. Great heavy bunches of roses or lilies or daisies, covering the entire crown, as if scattered carelessly over it, are a fancy of the moment. These are held by a

A SUMMER COAT—5048.

small bow of velvet ribbon, as if the flowers were merely tied in a loose bunch.

Stripes are still prevalent, but they are now varied with plain materials. Little coats of taffeta or very light cloth or, again, of thick tussore, which was so much seen last spring, are worn with the striped flannel suits so much in vogue of late.

Curls have quite disappeared from the Parisienne's coiffure, and she now wears her hair in the broad, full waves that suit so well the popular cloche hats. Curls when worn for evening are distributed rather than arranged in clusters.

To gain the Japanese shoulder and sleeve effects all sorts of trimming are employed. Flat bands have embroidery done in colored silks on taffeta, linen or pique in a plain color, and they make the shoulders appear several inches wider when combined with platings of taffeta.

A watch fob that is pretty for wear with the tailored costume has a coin purse under its leather tab which is decorated with a monogram or swastika.

Roman ribbons in shades of blue and brown with cross stripes of yellow make smart bow ties.

The pretty little coat in the picture is simple in the extreme, yet takes beautiful lines when made up in ponce, taffeta, cloth or linen.

**Notice of Final Proof.**

Department of the Interior, Land Office at Lakeview, Oregon, Oct. 29, 1907.

Notice is hereby given that Marshall W. Bowen, of Paisley Oregon, has filed notice of his intention to make final computation proof in support of his claim, viz: Homestead entry No. 3504 made Oct. 16, 1905, for the S 1/2 NW 1/4 and N 1/2 SW 1/4, Section 4, Township 35 S., Range 17 E., W. M., and that said proof will be made before Register and Receiver, at Lakeview Oregon, on 10th day of December, 1907.

He names as witnesses to prove his continuous residence upon, and cultivation of, the land, viz: Mike Doohar, Klamath Falls Oregon, C. H. Dusenbery, Paisley Oregon, S. L. Wood, Bly, Oregon, M. B. Whitehouse, Paisley, Oregon, J. N. Watson, Register, 44-5.
