FOUL CLOVER SEED.

Makes it Plain Where the Weed Crop Comes From. The Connecticut experiment station is doing a great work in testing clover seed. It obtained fifty-one samples of the seed just as it is sold by Connecticut seed dealers. These samples were tested for weed seeds and also to see what per cent of the clover seed would sprout. The result of the test shows that only one-sixth of the seed as sold was fit to use. Three samples were adulterated with a worthless plant, and forty-one had more or less dodder, the most dangerous weed or parasite which can get into the crop. Few days pass without a complaint from some one who finds the dodder in his clover. Samples are often sent in showing the clover plants strangled by a pest which twines around them and sucks their life away. The cut shows a mild form of the affliction. Think of putting the seeds of this curse into the ground when you seed your clover! Yet that is just what is being done when we buy ordinary clover seed. In one sample of this Connecticut clover seed 6,441 seeds of the dodders

DODDER ON CLOVER PLANT.

were in one pound of clover seed. In that same sample there were 12,709 seeds of plantain, 1,605 of foxtail, 1,017 of sorrel, 226 of bindweed, 2,147 of lamb's quarters, 1,808 of wild carrot, 220 of curled dock, 1,243 of tumbleweed and many others, making a total of 44,522 weed seeds in a pound. In another sample there were 78,004 weed seeds in one pound sold as clover seed. Just imagine what a farmer does when he sows six or eight pounds of such stuff on an acre!

Another thing was the low quality of the clover itself. It has been demonstrated that the heaviest seeds give the strongest plants during early growth and in most cases largest yields. This Connecticut bulletin states that clover seed of average quality should run 302,000 to the pound. While lighter seed may give a greater number of plants, a greater proportion of them would die out or do poorly. In twenty-six out of fifty-one samples the seeds weighed less than the standard. As for vitality, the average of these fifty-one Connecticut samples was 86.6 per cent—that is, the number out of a hundred strong enough to put out a sprout. One sample showed only 64.2 per cent of seeds with any life to them. One sample was so poor that only 48.1 per cent of the seed was clover, and only 84 per cent of that would sprout. Three samples were evidently adulterated with black medic. Seed of this plant is imported from Germany expressly to adulterate clover seed. It is so much like clover seed that an expert is needed to detect it. In one sample there were 11,615 seeds of dodder in one pound of clover. With a seeding of eight pounds per acre this means two seeds of dodder to each square foot, and tests prove that this dodder is not dead seed.

Hints to Mushroom Growers. In turning up a portion of a bed maggots may be discovered in the manure. A few may do no perceptible harm, but a large number will eat up the spawn, leaving not even a thread to develop a single mushroom. Many kinds of insects are apt to swarm in warm cellars, together with the egg laying varieties which cause the maggots, regardless of foul air which may often accumulate and which is an injury to the mushrooms. In each succeeding bed in large cellars insects follow up the new beds and become more vigorous. A high temperature such as we had last fall is conducive to their continued existence in summer garb. A good crop, however, can be secured in spite of them when the houses are kept at all times cool. When mushrooms are grown in glass houses the return pipes are best run under the walks. In the usual way of heating, where the pipes run under the benches, paper placed over the beds will be found beneficial as a protector from excessive heat and drying. With good, vigorous spawn, properly prepared compost and care about the requirements of heat and moisture, a good crop is a positive certainty. There are garden crops equal to if not surpassing the mushroom as money makers to the producer, but no one need complain of well managed mushrooms.

LAKE COUNTY ABSTRACT CO. INCORPORATED

A Complete Record

We have made an entire transcript of all Records in Lake County, which, in any way, affect Real Property in the county. We have a complete Record of every Mortgage and transfer ever made in Lake County, and every Deed given.

ERRORS FOUND.

In transcribing the records we have found numerous mortgages recorded in the Deed record and not indexed; and many deeds are recorded in the Mortgage record and other books. Hundreds of mortgages and deeds are not indexed at all, and are most difficult to trace up from the records.

We have notations of all these Errors:

Others cannot find them. We have spent hundreds of dollars hunting for these errors, and we can guarantee our work.

J. D. VENATOR, Manager.

Marked for Death Three years ago I was marked for death. A grave yard cough was tearing my lungs to pieces. Doctors failed to help me, and hope had fled, when my husband got Dr. King's New Discovery. It says Mrs. A. C. Williams, of Bac, Ky. "The first dose helped me and improvement kept on until I had gained 58 pounds in weight and my health was fully restored." This medicine holds the world's healing record for coughs and colds and lung and throat diseases. It prevents pneumonia. Sold under guarantee at Thornton's Drug store, 334 and 18. Trial bottle free.

TONY PASTOR AS SANTA.

Veteran Actor Was the Friend of the Stage Children.

There are at present engaged in different capacities on the stage and in the theaters about 400 children to whom the holidays usually are days of toil, and many of these little folks are breadwinners for younger brothers and sisters. It was for them that the late Tony Pastor and his wife, Mrs. E. L. Fernandez, and "Aunt Louisa" Eldridge, now dead, inaugurated the Christmas festival which has become a perennial affair. The little ones, all less than twelve years old, provide the stage entertainment on these occasions, and there never is any interference by the authorities. Christmas, 1907, was Tony Pastor's last appearance as the children's Santa Claus, and this year they will miss his genial face and kindly attentions. Last year he was master of ceremonies and introduced his tiny "top liners." At the end of the act he presented to each of the girls a beautifully dressed doll and to the boys boxes of candy, or appropriate toys. Admission was by invitation only, and when the programme began the house was crowded to the doors, the balcony being given up largely to poor children of the east side. Some of the actors were mere babies, but they went through the business like veterans, and the gravity of most of them when singing their comic songs was immensely amusing.

One of the players was presented as Baby Esmond, a perfect cherub, who piped a love ditty and danced with one foot held in the air. Mr. Pastor said she was of "this year's crop," and when she had ended the performance he asked her to tell the audience her age. Without shrinking from the question, as her fellow actresses do, she flapped, "I'll be four next January."

Another of the same mature years was "Miss Mirlan Jackson," if you please. She came out with a Teddy bear in her arms, sang a song and did such clever capering that every woman in the audience wanted to hug her.

Lillian Tobin, herself no bigger than a doll baby, sang "Poor John" and invited the audience to join her in the chorus, which it did with a will. At the end of the programme Mr. Pastor announced that a banquet was awaiting the children in the basement of Tammany hall. After the little ones had been satisfied in that respect they were sent to the main hall of the building, and there the really big feature of the evening took place. On the stage stood three Christmas trees, bending over from the weight of pretty things, while the stage itself was heaped with toys.

After that there was a second distribution for stage children only in the committee room of Tammany hall.

Most of the children had written requests for certain articles, and as they appeared one by one and gave a name corresponding with that on Mrs. Fernandez's list the present asked for was delivered. Some of these were of costly quality, having been purchased with money donated to the cause. Mrs. Fernandez said the children of the stage nowadays ask for useful things rather than for playthings. Since these events were inaugurated it is estimated that more than \$50,000 has been spent for gifts.—New York Herald.

America's Greatest Weekly

THE TOLEDO BLADE

TOLEDO, OHIO The Best known Newspaper in the United States CIRCULATION 200,000 Popular in Every State

In many respects the Toledo Blade is the most remarkable weekly newspaper published in the United States. It is the only newspaper especially edited for National circulation. It has had the largest circulation for more years than any newspaper printed in America. Furthermore, it is the cheapest newspaper in the world, as will be explained to any person who will write us for terms. The News of the World so arranged that busy people can more easily comprehend, than by reading cumbersome columns of dailies. All current topics made plain in each issue by special editorial matter written from inception down to date. The only paper published especially for people who do not read daily newspapers, and yet thirst for plain facts. That this kind of a newspaper is popular, is proven from the fact that the Weekly Blade now has over 200,000 yearly subscribers, and is circulated in all parts of the United States. In addition to the news, the Blade publishes short and serial stories, and many departments of matter suited to every member of the family. Only one dollar a year. Write for free specimen copy.
